## NEW SPECIAL PUBLICATIONS . . .

### Topics in Medicinal Chemistry (4th SCI-RSC Medicinal Chemistry Symposium)

(Special Publication No. 65)

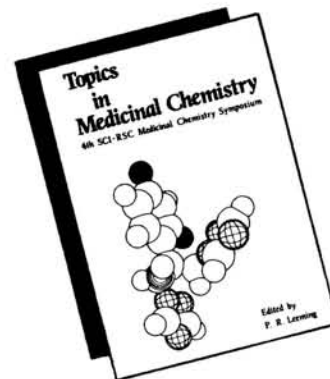

This important new book is the published proceedings of the 4th Medicinal Chemistry Symposium, which is part of a series established as a major international forum for the presentation and discussion of recent scientific advances, relevant to drug discovery.

Topics in Medicinal Chemistry covers neuropeptide hormones and antagonists; drugs designed to inhibit enzymatic processes; antiviral agents (including those of clinical value in combatting Herpes and Human Immunodeficiency Virus); and antifungal, antiparasitic and antimalarial agents. The book also explores the effective application of computational science to medicinal chemistry.

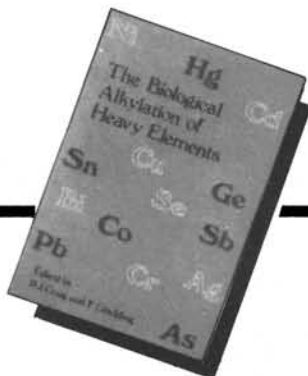

The inclusion of Antiviral Agents, illustrates the considerable advance made in this therapeutic area in recent years.

**Brief Contents:**

Neuropeptides; Control of Enzymatic Processes in Medicinal Chemistry; Antiviral Agents; Antibacterial, Antifungal and Antiparasitic Agents; Applications of Computing to Medicinal Chemistry.
