trends in Polymer Science

Special introductory offer
25% off

This is *not* just another polymer journal!

1st issue
.....
January '93

Topics covered include:

- photorefractive polymers
- electrical and optical properties
- polymer grafting on to C60
- polymeric liquid crystals
- engineering thermoplastics
- ultrahigh modulus fibres
- polymers as controlled drug release media
- computer modelling of polymer systems
- new microscopic and spectroscopic techniques
- biological routes to new polymers
- polymers and the environment

A unique, refreshing and reliable approach to keeping up with the latest developments.

Trends in Polymer Science is an unrivalled review journal containing specially commissioned, rigorously peer-reviewed and carefully edited articles which guarantee the quality you need - in the most interesting and stimulating format.

Trends in Polymer Science... it's the best way to stay informed of today's macromolecular research.

Trends in Polymer Science 1993 Subscriptions

- Please enter my **Personal Subscription** at the special 25% discounted introductory price of £49.00 UK/ROW; \$74.00 USA/Canada (Normal price: £65 UK/ROW; \$98.00 USA/Canada)
12 monthly issues beginning _____ 1993 (enter month from April-Dec)
The Personal Subscription must be prepaid by personal cheque or credit card
- Please send me information on the **Institutional/Library Subscription**
- Please send me a free sample copy of *Trends in Polymer Science*
- Please send information about other Elsevier publications

Payment

- Personal cheque, Eurocheque, or money order made payable to Elsevier
- Credit card** Visa/Barclaycard; Mastercard/Access; Am. Ex.

ROYAL SOCIETY OF CHEMISTRY

IMPORTANT ORGANIC CHEMISTRY BOOK

100 Modern Reagents

Consulting Editor:

Dr N.S. Simpkins

University of Nottingham

1st Reprint 1992

The challenge of carrying out highly selective chemical transformations on ever more complex molecules has resulted in the development of a vast armoury of organic reagents. This book brings together a selection of 100 reagents which have found significant application in organic synthesis.

100 Modern Reagents features less familiar reagents which have been identified in *Methods in Organic Synthesis* during a five year period. The selection reflects reagents which have found widespread use, with emphasis on those which allow important transformations or which show interesting and varied reactivity.

The book includes the following data on each reagent listed:

- ★ name
- ★ molecular formula
- ★ physical properties
- ★ price range
- ★ structure
- ★ molecular weight
- ★ preparation and modifications
- ★ safety precautions needed

The reagents are arranged in alphabetical order and cover two pages each, with the second page providing three reaction schemes highlighting the uses of the reagent.

Softcover 210 pages

ISBN 0 85186 893 2 (1989)

Price £24.00

Information
Services

To Order, Please write to the:

Royal Society of Chemistry, Turpin Distribution Services Limited, Blackhorse Road, Letchworth, Herts SG6 1HN, United Kingdom.
or telephone (0462) 672555 quoting your credit card details. We accept Access/Visa/MasterCard/Eurocard.

Turpin Distribution Services Limited is wholly owned by the Royal Society of Chemistry.

For information on other books and journals, please write to:

Royal Society of Chemistry, Sales and Promotion Department, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, United Kingdom.

RSC Members should obtain members prices and order from :

The Membership Affairs Department at the Cambridge address above.
