## Chemical Communications – 1994

From the beginning of 1994, each communication in *Chemical Communications* will start on a fresh right-hand page, and will be limited to two pages in length. The vast majority of communications already fall within this two-page limit. Authors will be asked to shorten communications that are longer than two pages, and should bear in mind our requirements for brevity in drafting their manuscript.

In particular:

- Extensive historical introduction and associated references should not be included; all that is needed is brief information to put the work in context.
- Duplication of results in the text and Tables and/or Figures must be avoided.
- Tables and Figures should be included only if their content is essential; more extensive tabulation of data and illustration of results should be reserved for the full paper.
- Supplementary information on compound characterisation is useful for the referees.

Only in very exceptional circumstances, requiring special justification from the author, will communications be allowed to extend to four printed pages.

# MENDELEEV COMMUNICATIONS

**Mendeleev Communications** is a unique publication providing rapid access to the extensive chemical research activities of an important and fascinating world region – the Commonwealth of Independent States. **It is not a translation journal; all material is published directly in English and is therefore as up-to-date as possible.**

**Mendeleev Communications** is a joint publishing venture between The Royal Society of Chemistry and The Russian Academy of Sciences. It contains preliminary accounts of novel and significant results of wide general appeal or exceptional specialist interest on any branch of chemistry. Most papers are submitted from the CIS but some come from other parts of the world. **Mendeleev Communications** acts as both a means and a stimulus for international dialogue.

## Mendeleev Communications:

- ★ Has proved so successful that it is now published six times per annum
- ★ Is not a translation journal
- ★ Publishes rapidly – within 12 weeks of receipt of papers in the UK
- ★ Will accept high quality papers on all topics of chemistry
- ★ Offers a unique insight into the research activities of the CIS

## Joint Editors-in-Chief:

H M Frey, University of Reading, UK  
O M Nefedov, Vice-President of the Russian Academy of Sciences, Moscow, Russian Federation

**UK Staff Editor:** Andrew Wilkinson, Royal Society of Chemistry, Cambridge, UK

**Moscow Staff Editor:** Irina V Makhova, Russian Academy of Sciences, Moscow, Russian Federation
