

Electronic Supplementary Material

“Chiral Information Transfer by Solid-Solid Interaction:
Application for Absolute Configuration Assignment”

Yasutaka Tanaka, Yoshinobu Murakami and Riemi Kiko

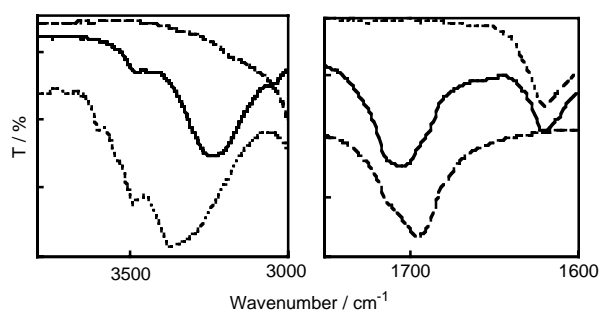

Fig. IR spectra of a ground mixture of **1a** and 2-methylglutaric acid (solid line), **1a** (dotted line), and 2-methylglutaric acid (dashed line) in a Nujol mull.

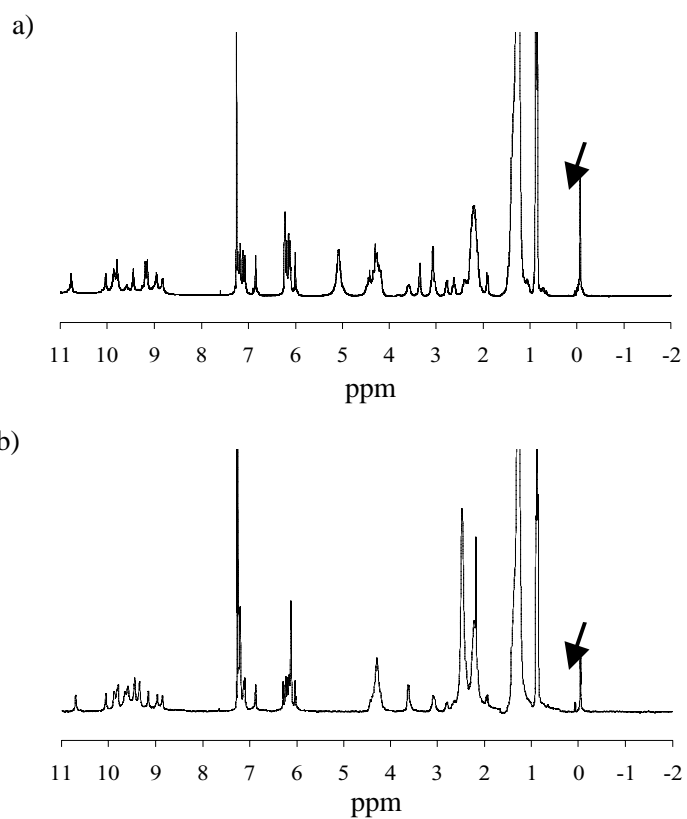

Fig. ^1H NMR spectra (CDCl_3) of a) the authentic complex of **1a** and methyl- β -D-glucopyranoside and b) a ground mixture of **1a** and methyl- β -D-glucopyranoside. The arrows indicate the upfield shifted methyl resonance of the glycoside.
