

Interface engineering for solid-state dye-sensitised nanocrystalline solar cells: the use of an organic redox cascade

Narukuni Hirata, Jessica E. Kroeze, Taiho Park, David Jones, Saif A. Haque, Andrew B. Holmes and James R. Durrant

Chem. Commun., 2006 (DOI: 10.1039/b513180d)

The chemical structure of the polymer in Fig. 3 is incorrect. The correct structure is given below.

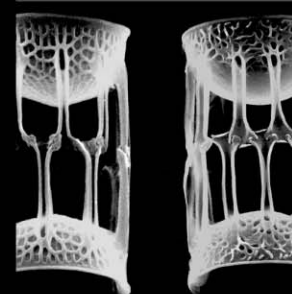

The Royal Society of Chemistry apologises for this error and any consequent inconvenience to authors and readers.

Additions and corrections can be viewed online by accessing the original article to which they apply.

NPR

Natural Product Reports

A critical review journal, stimulating progress in all areas of natural products research. With a high impact factor of 7.9, NPR has an international reputation and reference links to ChemPort and CrossRef as well as being cited in Medline.

Recently published reviews include;

Structure, activity, synthesis and biosynthesis of aryl-C-glycosides

Tsion Bililign, Byron R. Griffith and Jon S. Thorson, USA

Indolizidine and quinolizidine alkaloids

Joseph P. Michael, South Africa

Biosynthesis of marine natural products: micro-organisms

Bradley S. Moore, USA

Natural product family 18 chitinase inhibitors

Ole A. Andersen, Mark J. Dixon, Ian M. Eggleston and Daan M. F. van Aalten, Scotland

For the
highest quality research
in physical chemistry ...

Choose PCCP

- you are guaranteed to find top quality original research in physical chemistry, chemical physics and biophysical chemistry. Add the fastest publication times in the field and weekly issues, and you can rely on PCCP to bring you the best research faster than any other physical chemistry journal.

Apply this PCCP Certainty Principle today!
