

# **Dalton Transactions...**

2.926

**Dalton Transactions** is the highest ranked European journal for inorganic chemistry, with an impact factor of 2.926. Recently quoted as the most highly cited inorganic chemistry journal according to ISI Essential Indicators Web Products, **Dalton Transactions** is the only place to get your work noticed.

STATE

Publication states include both **printed** and **online** versions, each with a new **easy-to-read format**. The improved legibility enables readers to browse the articles quickly and effortlessly.

## ...the essential element

#### **Professor Andrew Evans**

US Associate Editor for organic chemistry, ChemComm

ChemComm is the leading international journal for the publication of communications on important new developments in the chemical sciences.

Each one of ChemComm's US Associate Editors is happy to receive submissions from the Americas in their subject area.

Professor Evans is Professor of Organic and Organometallic Chemistry at Indiana University, a position he has held since 2001. His research group is engaged in the exploration and development of reactive intermediates for the expeditious synthesis of complex biologically important natural products.

#### **Call for papers!**

Professor Evans is pleased to receive papers on important developments in organic chemistry. Submit today at **www.rsc.org/resource** 

For enquiries, please contact: Professor Evans at chemcomm@indiana.edu

### Why publish in ChemComm:

- Impact factor: 3.997
- Rapid publication typically 60 days (from receipt to publication)
- Now: weekly publication
- 3 page communications providing authors with the flexibility to develop their results and discussion
- 40 years publishing excellent research
- High visibility indexed in MEDLINE
- 'Hot papers' are highlighted helping authors to promote their work
- FREE colour where scientifically necessary
- FREE inclusion in Chemical Biology Virtual Journal
