

Make an impact

***ChemComm*, a leading weekly international journal for the publication of communications on important new developments, supplies a vibrant blend of high quality research from across the chemical sciences.**

With rapid publication times, a rigorous peer review process and an impact factor of 4.426, *ChemComm* has high visibility (indexed in MEDLINE) and is the perfect choice for work that commands universal respect.

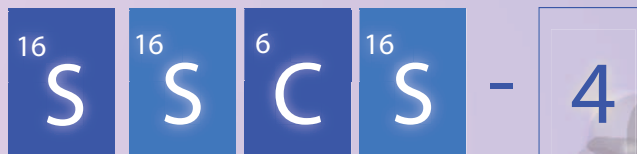

Offering the flexibility of a 3 page communication limit and additional unique features such as html enhancement with our new Project Prospect (www.projectprospect.org), *ChemComm* celebrates more than 40 years of publishing excellence with a service that's out of this world.

Submit your work to *ChemComm* now and get light years ahead of the competition!

Registered Charity Number 207890

Southampton Supramolecular Chemistry Symposium-4

13th July 2007 from 11am at the School of Chemistry,
University of Southampton.

Speakers will include:

Professor Harry Anderson (Oxford)
Supramolecular control of molecular wires

Professor Steve Loeb (Windsor)
Rotaxanes as ligands for molecular machines and metal organic frameworks

Professor Javier de Mendoza (ICIQ)
Deep calixarenes: nanoscopic cavities for recognition and catalysis

Professor David Parker (Durham)
Engineering lanthanide probes for imaging and sensing

Dr Eugen Stulz (Southampton)
DNA as a supramolecular scaffold for porphyrin arrays

RSC | Advancing the
Chemical Sciences

Due to the generosity of our sponsors there are no registration fees for this meeting. However space is limited so if you would like to attend please confirm by e-mail to: philip.gale@soton.ac.uk

STOP PRESS... A date for your diary next year SSCS-5 11th July 2008. Speakers will include Professor François Diederich (ETH, Zürich) and Professor Jean-Pierre Sauvage (Strasbourg)
