COMMUNICATION

Asuman Durmus, Gorkem E. Gunbas, Pinar Camurlu and Levent Toppare
A neutral state green polymer with a superior transmissive light blue oxidized state

FEATURE ARTICLE

Brian G. Trewyn, Supratim Giri, Igor I. Slowing and Victor S.-Y. Lin
Mesoporous silica nanoparticle based controlled release, drug delivery, and biosensor systems

1359-7345(2007)31;1-5

See science come alive ...

“ [Project Prospect] is an exciting application of ontologies that will help researchers. ”

Midori Harris
European Bioinformatics Institute

“ Invaluable for students. ”

Stephen Haswell
University of Hull, UK

“ This is terrific! ”

Brian Shoichet
*University of California, San Francisco and
Molecular BioSystems' Board member*

“ ...a fantastic resource for the community and a great use of the Gene Ontology and Sequence Ontology. ”

Chris Mungall
Lawrence Berkeley National Laboratory

Features include

Ontology terms linked to definitions and related papers

RSS feeds with ontology terms and compound structures

Hyperlinked compound information in text

IUPAC Gold Book terms linked

Benefits

Ideal for students

Completely free service

At a glance HTML view with additional features accessed by toolbox

Downloadable compound structures

Printer friendly

...with *Molecular BioSystems* and Project Prospect

A revolutionary change in the way chemical and molecular biology articles are published is underway - thanks to Project Prospect, an initiative developed by RSC Publishing together with academic partners. Not only can *Molecular BioSystems* readers click on named compounds in a journal article to download structures, more importantly they can link to definitions of ontology terms plus related papers. Powerful functionality instantly helps researchers and their students to find, understand and share (bio)chemical knowledge with each other quicker than ever before. See the science in *Molecular BioSystems* (and other RSC journals) come alive: visit the Project Prospect website for more details plus examples.
