

Subject Index of Volume 110

- Accelerating rate calorimeters (ARC)
A general kinetic model framework for the interpretation of adiabatic calorimeter rate data, 67
- Activated carbon
Adsorptive purification of phenol wastewaters: Experimental basis and operation of a parametric pumping unit, 101
- Adsorption
Adsorptive purification of phenol wastewaters: Experimental basis and operation of a parametric pumping unit, 101
- Agglomeration
Numerical study on particle size distribution in the process of preparing ultrafine particles by reactive precipitation, 19
- Axial dispersion
Axial dispersion in single pellet-string columns packed with unusually shaped porous pellets, 11
- Catalytic reactions
Behaviour of smooth catalysts at high reaction rates, 41
- Catalytic reduction
Improvement in selective catalytic reduction of nitrogen oxides by using dielectric barrier discharge, 79
- Cellulose
Hydrogen production from catalytic gasification of cellulose in supercritical water, 57
- Conducting polymers
A factorial-design study of the variables affecting the electrochemical reduction of Cr(VI) at polyaniline-modified electrodes, 113
- Continuous reactor
Continuous photodegradation of naphthalene in water catalyzed by TiO₂ supported on glass Raschig rings, 123
- Dielectric barrier discharge
Improvement in selective catalytic reduction of nitrogen oxides by using dielectric barrier discharge, 79
- Diffusion-reaction
Behaviour of smooth catalysts at high reaction rates, 41
- Dispersion
Axial dispersion in single pellet-string columns packed with unusually shaped porous pellets, 11
- Effectiveness factor
Behaviour of smooth catalysts at high reaction rates, 41
- Electrochemical engineering
A factorial-design study of the variables affecting the electrochemical reduction of Cr(VI) at polyaniline-modified electrodes, 113
- Environmental electrochemistry
A factorial-design study of the variables affecting the electrochemical reduction of Cr(VI) at polyaniline-modified electrodes, 113
- Gasification
Hydrogen production from catalytic gasification of cellulose in supercritical water, 57
- Gas-phase oxidation reaction
Behaviour of an elementary oxidation reaction in a semi-batch reactor, 31
- Hexavalent chromium
A factorial-design study of the variables affecting the electrochemical reduction of Cr(VI) at polyaniline-modified electrodes, 113
- Hopf bifurcation
Behaviour of an elementary oxidation reaction in a semi-batch reactor, 31
- Hydrodynamic analogy
A new approach to fluid separation modelling in the columns equipped with structured packings, 87
- Hydrogen production
Hydrogen production from catalytic gasification of cellulose in supercritical water, 57
- Integrated reaction and heat exchange
Parametric study of microreactor design for water gas shift reactor using an integrated reaction and heat exchange model, 1
- Kinetic modeling
A general kinetic model framework for the interpretation of adiabatic calorimeter rate data, 67
- Kinetics
Photocatalytic degradation of 4-nitroaniline using solar and artificial UV radiation, 129
- Mass and heat transfer
A new approach to fluid separation modelling in the columns equipped with structured packings, 87
- Mass transfer
Axial dispersion in single pellet-string columns packed with unusually shaped porous pellets, 11
- Microreactor design
Parametric study of microreactor design for water gas shift reactor using an integrated reaction and heat exchange model, 1
- MOC (material of construction) incompatibility in storage
A general kinetic model framework for the interpretation of adiabatic calorimeter rate data, 67
- Multi-step reactions
A general kinetic model framework for the interpretation of adiabatic calorimeter rate data, 67
- Naphthalene
Continuous photodegradation of naphthalene in water catalyzed by TiO₂ supported on glass Raschig rings, 123

- Nitroaniline
Photocatalytic degradation of 4-nitroaniline using solar and artificial UV radiation, 129
- Nitrogen oxides
Improvement in selective catalytic reduction of nitrogen oxides by using dielectric barrier discharge, 79
- Numerical simulation
Numerical study on particle size distribution in the process of preparing ultrafine particles by reactive precipitation, 19
- Oscillations
Behaviour of an elementary oxidation reaction in a semi-batch reactor, 31
- Ozonization
Improvement in selective catalytic reduction of nitrogen oxides by using dielectric barrier discharge, 79
- Parameter identification
Axial dispersion in single pellet-string columns packed with unusually shaped porous pellets, 11
- Parametric pumping
Adsorptive purification of phenol wastewaters: Experimental basis and operation of a parametric pumping unit, 101
- Particle size distribution
Numerical study on particle size distribution in the process of preparing ultrafine particles by reactive precipitation, 19
- Particle
Axial dispersion in single pellet-string columns packed with unusually shaped porous pellets, 11
- Phenol
Adsorptive purification of phenol wastewaters: Experimental basis and operation of a parametric pumping unit, 101
- Photocatalysis
Photocatalytic degradation of 4-nitroaniline using solar and artificial UV radiation, 129
- Photodegradation
Continuous photodegradation of naphthalene in water catalyzed by TiO₂ supported on glass Raschig rings, 123
- Polymeric adsorbents
Adsorptive purification of phenol wastewaters: Experimental basis and operation of a parametric pumping unit, 101
- Pool-chemical approximation
Behaviour of an elementary oxidation reaction in a semi-batch reactor, 31
- Reactive precipitation
Numerical study on particle size distribution in the process of preparing ultrafine particles by reactive precipitation, 19
- Reticulated vitreous carbon
A factorial-design study of the variables affecting the electrochemical reduction of Cr(VI) at polyaniline-modified electrodes, 113
- Runaway reactions
A general kinetic model framework for the interpretation of adiabatic calorimeter rate data, 67
- Semi-batch reactor
Behaviour of an elementary oxidation reaction in a semi-batch reactor, 31
- Shape factor
Behaviour of smooth catalysts at high reaction rates, 41
- Single pellet-string column
Axial dispersion in single pellet-string columns packed with unusually shaped porous pellets, 11
- Structured packing
A new approach to fluid separation modelling in the columns equipped with structured packings, 87
- Supercritical water
Hydrogen production from catalytic gasification of cellulose in supercritical water, 57
- TiO₂
Photocatalytic degradation of 4-nitroaniline using solar and artificial UV radiation, 129
- Titanium dioxide
Continuous photodegradation of naphthalene in water catalyzed by TiO₂ supported on glass Raschig rings, 123
- Two-phase flow
A new approach to fluid separation modelling in the columns equipped with structured packings, 87
- Water gas shift reaction
Parametric study of microreactor design for water gas shift reactor using an integrated reaction and heat exchange model, 1
