

Publisher's note

With this issue of *Chemical Engineering Journal*, the Publisher is delighted to announce that the editorial team will be further strengthened by the appointment of Professor Guy B. Marin as Editor of the section on chemical reaction engineering.

Guy is currently Professor of Chemical Engineering at Ghent University (Belgium). He received his degree from Ghent University in 1976 where he also obtained his Ph.D. in 1980 and tenure in 1986 after a post-doctoral stay at Catalytica Associates and Stanford University. He accepted the position of full professor in 1988 at Eindhoven University of Technology (The Netherlands) where he lectured on chemical reactors. In 1997 he returned to Ghent University as director of the Laboratorium voor Petrochemische Techniek.

Chemical reaction engineering and catalysis in general, and reaction kinetics in particular is the focus of Guy's research program. He has co-authored more than 200 papers in international journals and is a member of several scientific committees advising companies and governmental organizations. In addition to acting as Editor-in-Chief of *Advances in Chemical Engineering*, Guy serves on the editorial board of *Chemical Engineering Research and Design*, the official journal of the European Federation of Chemical Engineering.

Authors are invited to submit articles to Professor Guy B. Marin online at <http://ees.elsevier.com/cej/>
