Subject Index of Volume 127

Acoustic field
Modeling aspects of dual frequency sonochemical reactors, 71
Activated carbon
Equilibrium and kinetic studies on basic dye adsorption by oil palm fibre activated carbon, 111
Adsorption of basic dye onto activated carbon prepared from durian shell: Studies of adsorption equilibrium and kinetics, 121
Adsorption
Adsorption of basic dye onto activated carbon prepared from durian shell: Studies of adsorption equilibrium and kinetics, 121
Adsorption isotherm
Equilibrium and kinetic studies on basic dye adsorption by oil palm fibre activated carbon, 111
Advanced oxidation processes (AOPs)
Photocatalytic degradation of an azo dye in a tubular continuous-flow photoreactor with immobilized TiO_2 on glass plates, 167
Antagonism
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177
Artificial neural networks
Model based control of a yeast fermentation bioreactor using optimally designed artificial neural networks, 95

Binary biosorption
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177
Biodegradation
Biodegradation kinetics and microbial communities associated with methyl *tert*-butyl ether removal in a biotrickling filter, 143
Biotrickling filter
Biodegradation kinetics and microbial communities associated with methyl *tert*-butyl ether removal in a biotrickling filter, 143
Bubble dynamics
Modeling aspects of dual frequency sonochemical reactors, 71

C.I. Acid Red 27
Photocatalytic degradation of an azo dye in a tubular continuous-flow photoreactor with immobilized TiO_2 on glass plates, 167
Catalytic combustion
Numerical investigation on the application of catalytic combustion to HCCI engines, 81
CeO_2
Reactivity of high surface area CeO_2 synthesized by surfactant-assisted method to ethanol decomposition with and without steam, 31
Chemical characterization
Chromophores removal in pulp and paper mill effluent via hydrogenation-biological batch reactors, 59
Chromophores
Chromophores removal in pulp and paper mill effluent via hydrogenation-biological batch reactors, 59
Color removal
Chromophores removal in pulp and paper mill effluent via hydrogenation-biological batch reactors, 59
Computation fluid dynamics
Modelling vortex formation in an unbaffled stirred tank reactors, 11
Computer simulation
Rapid removal of trace HCHO from indoor air by an air purifier consisting of a continuous concentrator and photocatalytic reactor and its computer simulation, 157
Continuous concentrator
Rapid removal of trace HCHO from indoor air by an air purifier consisting of a continuous concentrator and photocatalytic reactor and its computer simulation, 157
Continuous-flow photoreactor
Photocatalytic degradation of an azo dye in a tubular continuous-flow photoreactor with immobilized TiO_2 on glass plates, 167
Copper(II)
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177
Cr(VI)
Reclamation of Cr(VI) rich water and wastewater by wollastonite, 151

Decolorization
Photocatalytic degradation of an azo dye in a tubular continuous-flow photoreactor with immobilized TiO_2 on glass plates, 167
Design model
Experimental behaviour and design model of a fluidized bed reactor with immobilized peroxidase for phenol removal, 47
Dried sugar beet pulp
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177
Dual frequency operation
Modeling aspects of dual frequency sonochemical reactors, 71
Durian shell
Adsorption of basic dye onto activated carbon prepared from durian shell: Studies of adsorption equilibrium and kinetics, 121

Electrical impedance tomography (EIT)
An experimental evaluation of state estimation with fluid dynamical models in process tomography, 23
Equilibrium
Equilibrium and kinetic studies on basic dye adsorption by oil palm fibre activated carbon, 111
Equilibrium modeling
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177
ESP
A technical assessment of a particle hybrid collector in a pilot plant, 131
Estimation
An experimental evaluation of state estimation with fluid dynamical models in process tomography, 23
Ethanol
Reactivity of high surface area CeO_2 synthesized by surfactant-assisted method to ethanol decomposition with and without steam, 31

doi:10.1016/S1385-8947(07)00083-6

Fermentation bioreactor model
Model based control of a yeast fermentation bioreactor using optimally designed artificial neural networks, 95
Filtration
A technical assessment of a particle hybrid collector in a pilot plant, 131
Flue gas
A technical assessment of a particle hybrid collector in a pilot plant, 131
Fluidized bed
Experimental behaviour and design model of a fluidized bed reactor with immobilized peroxidase for phenol removal, 47
Formaldehyde
Rapid removal of trace HCHO from indoor air by an air purifier consisting of a continuous concentrator and photocatalytic reactor and its computer simulation, 157
Free surface vortices
Modelling vortex formation in an unbaffled stirred tank reactors, 11

Gemazol Turquoise Blue-G
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177

HCCI
Numerical investigation on the application of catalytic combustion to HCCI engines, 81
Heterogeneous photocatalysis
Photocatalytic degradation of an azo dye in a tubular continuous-flow photoreactor with immobilized TiO_2 on glass plates, 167
Hybrid collector
A technical assessment of a particle hybrid collector in a pilot plant, 131
Hydrogen
Reactivity of high surface area CeO_2 synthesized by surfactant-assisted method to ethanol decomposition with and without steam, 31
Hydrogenation-biological batch reactors
Chromophores removal in pulp and paper mill effluent via hydrogenation-biological batch reactors, 59

Immobilized peroxidase
Experimental behaviour and design model of a fluidized bed reactor with immobilized peroxidase for phenol removal, 47
Intensification
Modeling aspects of dual frequency sonochemical reactors, 71
Internal reforming
Reactivity of high surface area CeO_2 synthesized by surfactant-assisted method to ethanol decomposition with and without steam, 31
Intraparticle diffusion
Reclamation of Cr(VI) rich water and wastewater by wollastonite, 151

Kinetics
Equilibrium and kinetic studies on basic dye adsorption by oil palm fibre activated carbon, 111
Biodegradation kinetics and microbial communities associated with methyl *tert*-butyl ether removal in a biotrickling filter, 143
Reclamation of Cr(VI) rich water and wastewater by wollastonite, 151

Mathematical model
Rapid removal of trace HCHO from indoor air by an air purifier consisting of a continuous concentrator and photocatalytic reactor and its computer simulation, 157
Metals
A technical assessment of a particle hybrid collector in a pilot plant, 131
Methane
Numerical investigation on the application of catalytic combustion to HCCI engines, 81
Methyl *tert*-butyl ether (MTBE)
Biodegradation kinetics and microbial communities associated with methyl *tert*-butyl ether removal in a biotrickling filter, 143
Methylene blue
Equilibrium and kinetic studies on basic dye adsorption by oil palm fibre activated carbon, 111
Microbial community
Biodegradation kinetics and microbial communities associated with methyl *tert*-butyl ether removal in a biotrickling filter, 143
Microreactor
Gas phase partial oxidation of toluene over modified V_2O_5/TiO_2 catalysts in a microreactor, 39
Model based control
Model based control of a yeast fermentation bioreactor using optimally designed artificial neural networks, 95
Modification
Gas phase partial oxidation of toluene over modified V_2O_5/TiO_2 catalysts in a microreactor, 39
Multidimensional model
Numerical investigation on the application of catalytic combustion to HCCI engines, 81
Multi-zone model
Numerical investigation on the application of catalytic combustion to HCCI engines, 81

Nitrogen source
Biodegradation kinetics and microbial communities associated with methyl *tert*-butyl ether removal in a biotrickling filter, 143

Oil palm fibre
Equilibrium and kinetic studies on basic dye adsorption by oil palm fibre activated carbon, 111

Partial oxidation
Gas phase partial oxidation of toluene over modified V_2O_5/TiO_2 catalysts in a microreactor, 39
Particulate matter
A technical assessment of a particle hybrid collector in a pilot plant, 131
Phenol removal
Experimental behaviour and design model of a fluidized bed reactor with immobilized peroxidase for phenol removal, 47
Photocatalytic reactor
Rapid removal of trace HCHO from indoor air by an air purifier consisting of a continuous concentrator and photocatalytic reactor and its computer simulation, 157
Pilot plant
A technical assessment of a particle hybrid collector in a pilot plant, 131
Process tomography
An experimental evaluation of state estimation with fluid dynamical models in process tomography, 23
Pulp effluent
Chromophores removal in pulp and paper mill effluent via hydrogenation-biological batch reactors, 59
Raman spectroscopy
Influence of the temperature on the properties of the soot formed from C_2H_2 pyrolysis, 1
Reactivity
Influence of the temperature on the properties of the soot formed from C_2H_2 pyrolysis, 1
Reduction reaction
Chromophores removal in pulp and paper mill effluent via hydrogenation-biological batch reactors, 59
Removal
Reclamation of Cr(VI) rich water and wastewater by wollastonite, 151

Single-zone model
Numerical investigation on the application of catalytic combustion to HCCI engines, 81
SOFC
Reactivity of high surface area CeO_2 synthesized by surfactant-assisted method to ethanol decomposition with and without steam, 31

Sonochemical reactors
Modeling aspects of dual frequency sonochemical reactors, 71
Soot
Influence of the temperature on the properties of the soot formed from C_2H_2 pyrolysis, 1
Soybean peroxidase
Experimental behaviour and design model of a fluidized bed reactor with immobilized peroxidase for phenol removal, 47
State
An experimental evaluation of state estimation with fluid dynamical models in process tomography, 23
Stirred tanks
Modelling vortex formation in an unbaffled stirred tank reactors, 11
Synergism
Use of dried sugar beet pulp for binary biosorption of Gemazol Turquoise Blue-G reactive dye and copper(II) ions: Equilibrium modeling, 177

Thermodynamic parameters
Reclamation of Cr(VI) rich water and wastewater by wollastonite, 151
Toluene
Gas phase partial oxidation of toluene over modified V_2O_5/TiO_2 catalysts in a microreactor, 39
Transmission electron microscopy
Influence of the temperature on the properties of the soot formed from C_2H_2 pyrolysis, 1

UV/TiO_2
Photocatalytic degradation of an azo dye in a tubular continuous-flow photoreactor with immobilized TiO_2 on glass plates, 167

V/Ti oxides catalysts
Gas phase partial oxidation of toluene over modified V_2O_5/TiO_2 catalysts in a microreactor, 39
Volume of fluid
Modelling vortex formation in an unbaffled stirred tank reactors, 11

X-ray diffraction
Influence of the temperature on the properties of the soot formed from C_2H_2 pyrolysis, 1
