Chemical
Engineering
Journal

Publishers note

The Editors and Publisher are pleased to present the new cover for *Chemical Engineering Journal* (CEJ). As CEJ has evolved considerably in recent years, it becomes clear that the image of the journal should also better reflect the community that the publication serves. It is with this understanding that the cover appearing for the first time with this issue was designed.

The details for a "Featured Article" including title, author names and related artwork will be published on each issue of CEJ going forward. This provides our authors with an opportunity to promote their research accepted for publication in one of the Journal's three sections:

Environmental Chemical Engineering
Chemical Reaction Engineering
Materials Synthesis and Processing

Authors with an article accepted for publication are invited to submit a figure or other images representative of their research for consideration for the cover. Specific instructions are included in the acceptance letter following the Editor's decision regarding an author's manuscript. Instructions and further details can also be found in the Journal's [Guide for Authors](#).

The new cover and its continuously updated promotion of author research is an initiative we are excited about. This collaborative endeavor with our authors reiterates and emphasizes our commitment to the promotion and wide dissemination of the most timely and relevant research in the field of chemical engineering. We hope authors continue submitting figures as appropriate, and as always, we very much value their commitment to CEJ.

To submit your article to *Chemical Engineering Journal*, please visit <http://ees.elsevier.com/cej>.
