

In the papers by A. Zeeck, A. de Meijere et al. published in *Chem. Eur. J.* 2004, 10, 4708–4717 and A. de Meijere and B. D. Zlatoposkiy published in *Chem. Eur. J.* 2004, 10, 4718–4727, the formula of hormaomycin was reproduced with an incorrect configuration at C-3 of the (*S*)-isoleucine (Ile) moiety. The correct absolute configurations of hormaomycin and intermediates 16 and 17 in the total synthesis of hormaomycin are shown below. The authors apologize for this error.
