

SUBJECT INDEX FOR VOLUME 68, 1968

- Adsorption at high pressures, 277
Alkaloids, proaporphine, 321
Allylic strain in six-membered rings, 375
Amphiphilic compounds, binary and multicomponent solutions, 1
Aromatic compounds, electronic structure, 341
Benzodiazepines, chemistry of, 747
Binary and multicomponent solutions of amphiphilic compounds, 1
Biphenyls, 2,2'-disubstituted, cyclization reactions, 209
Chemical composition of tobacco and tobacco smoke, 153
Circular dichroism and optical rotatory dispersion, 525
Coordination compounds, transition-metal, photochemistry of, 541
Critical constants of organic substances, 659
Cyclization reactions of 2,2'-disubstituted biphenyls, 209
Diels-Alder, reverse, or retrodiene reaction, 415
2,2'-Disubstituted biphenyls, cyclization reactions, 209
Donor-acceptor interactions, structural chemistry of, 587
Electrochemical oxidation of organic compounds, 449
Electromotive force formation cells, molten salt, 253
Electronic structure in aromatic compounds, 341
Estrogens, steroidal, 85
Flavins, nucleosides and nucleotides, polarographic behavior, 295
Formation cells, molten salt electromotive force, 253
Fulvenes and substituted fulvenes, 41
Liquid crystal solutions, solubilization, formation, structure, and theoretical significance, 1
Manganese and its compounds, thermochemistry and oxidation potentials, 737
Metal π complexes with substituted olefins, 785
Molten salt electromotive force formation cells, 253
Multicomponent and binary solutions of amphiphilic compounds, 1
Nucleosides and nucleotides of purines, pyrimidines, pyridines, and flavins, polarographic behavior, 295
Olefins, substituted, with metal π complexes, 785
Optical rotatory dispersion and circular dichroism, 525
Oxidation, electrochemical, of organic compounds, 449
Oxidation potentials of manganese and its compounds, 737
Oxidation potentials of platinum group metals, 229
Photochemistry of transition-metal coordination compounds, 541
Photopolymerization of vinyl monomers, 125
Platinum group metals and their compounds, thermochemistry and oxidation potentials, 229
Proaporphine alkaloids, 321
Purines, nucleosides and nucleotides, polarographic behavior, 295
Pyridines, nucleosides and nucleotides, polarographic behavior, 295
Pyrimidines, nucleosides and nucleotides, polarographic behavior, 295
Retrodiene reaction, reverse Diels-Alder, 415
Reverse Diels-Alder or retrodiene reaction, 415
Six-membered rings, allylic strain in, 375
Steroidal estrogens, 85
Structural chemistry of donor-acceptor interactions, 587
Substituted fulvenes, 41
Thermochemistry of manganese and its compounds, 737
Thermochemistry of platinum group metals, 229
Thermochromism of inorganic compounds, 649
Tobacco and tobacco smoke, chemical composition, 153
Transition-metal coordination compounds, photochemistry of, 541
Vinyl monomers, photopolymerization, 125

Chemical Reviews Indexes.—Each annual volume has its own author and subject indexes in the December issue. A cumulative index for Volumes 1 through 60 was published in the December 1960 issue. The next cumulative index will appear in December 1970.

The cumulative index for all years through 1960 may be purchased for \$5.00 from the Special Issues Sales Department, American Chemical Society, 1155 Sixteenth St., N.W., Washington, D. C. 20036.

ERRATUM

Volume 68, 1968

Allylic Strain in Six-Membered Rings. By Francis Johnson

Page 332: Two names were omitted

from ref 39 which should read

A. M. Baradel, J. Dreux, R. Longaray, P. Laszlo, and H. Rivière, *Bull. Soc. Chim. France*, 3543 (1966).
