

SUBJECT INDEX

- Acids, fatty, synthesis of glycerides of, 845
Addition compounds of Group III elements, 101
Allyl polymerizations, 809
Antimony-antimony oxide electrode, 611
Aza-aromatic compounds, electronic transitions due to nonbonding electrons in, 689
Biotoxins, marine, 235
Boron trichloride, reaction with organic compounds, 1081
Catalysts, metal, polymerization of olefins by, 541
Chromyl compounds, chemistry of, 1
Complexes, molecular, energetics of, 1113
Complexing of metals by phosphates, 1011
Cryoscopy of molten salts, 461
Cyclopentadienes, 249
Electrode, antimony-antimony oxide, 611
dropping mercury, current-time relationship at, 1047
Electronic transitions due to nonbonding electrons, 689
Electrons, nonbonding, electronic transitions due to, 689
Elements, Group III, addition compounds of, 101
Fatty acids, synthesis of glycerides of, 845
Ferricyanide, oxidation by, 439
Fluorides, halogen, 869
Fuel, nitromethane as, 627
Glycerides of fatty acids, synthesis of, 845
Halogen fluorides, 869
Hydrogen-bromine system, reaction kinetics, thermodynamics, and transport in, 173
Infrared intensities and molecular structure, 581
Marine biotoxins, 235
Melamine, 131
Metals, complexing by phosphates, 1011
Molecular addition compounds of Group III elements, 101
complexes, energetics of, 1113
structure and infrared intensities, 581
Nitromethane, 627
Nucleotides, acid-soluble, naturally occurring, 645
Olefins, polymerization by complex metal catalysts, 541
2,4-Oxalolidediones, 63
Oxidation by ferricyanide, 439
by permanganate, kinetics and mechanism of, 403
Ozone, reaction with organic compounds, 925
Perchlorocyclopentenes, 249
Permanganate, oxidation by, kinetics and mechanism of, 403
Phosphates, metal complexing by, 1011
Polarographic diffusion current, 1047
Polymerization, allyl, 809
of olefins by complex metal catalysts, 541
Polyphosphoric acid as a reagent in organic chemistry, 321
Salts, molten, physical properties of, 461
Sedimentation analysis, theory of, 715
Structure, molecular, and infrared intensities, 581
System hydrogen-bromine, reaction kinetics, thermodynamics, and transport in, 173
Terphenyls, substituted, synthesis of, 895
Theory of sedimentation analysis, 715
Transitions, electronic, due to nonbonding electrons, 689
Trichloromethanesulfonyl chloride, 509

ERRATUM

Volume 57, Number 1, February, 1957

Page 53: In Section E, line 2, the last reference given should be 229 instead of 299.
