A sentence in section IV.C, Further Theoretical
Studies on NO-Porphyrins (p 876, first paragraph,
fifth line), should read as follows:

The η^2 side-bound configuration is found to be
stable only in certain cases, including $\text{MnP}(\text{NO})$,
 $\text{FeP}(\text{NO})^+$, and $\text{Ru}(\text{NO})\text{Cl}^+$, at an energy lower than
the η^1 -ON isomer.
