

Guide for authors preparing electronic documents

Do

- Enter text in the style and order of the journal.
- Insert figure captions and tables at the end of the file.
- Save any tables, diagrams, figures, graphs or illustrations, generated electronically as separate files and not embedded into the text file.
- Type references in the correct order and style of the journal.
- Type unjustified, without hyphenation, except for compound words.
- Type headings in the style of the journal.
- Use the TAB key once for paragraph indents.
- Where possible use Times for the text font and Symbol for the Greek and special characters.
- Use the word processing formatting features to indicate **Bold**, *Italic*, Greek, Maths, ^{Superscript} and _{Subscript} characters.
- Indicate clearly any special characters that you have drawn by hand.
- Check the final copy of your paper carefully, as any spelling mistakes and errors will be faithfully translated into the typeset version. In the case of a mismatch between disk and hard copy, the hard copy will be taken as the definitive version.
- Indicate on the form overleaf the contents of each file.
- Supply three hard copy printouts of the paper.

Do not

- Enter carriage returns to obtain spacing between lines, paragraphs, references etc. The space required is generated automatically by the typesetters.
- Use double spaces after each sentence within a paragraph.
- Use the automatic page numbering, running titles and footnote features of your word processing programme. Number the hard copies by hand at the bottom of the page.
- Include any copyright material (e.g. word processor software or operating system files) on the disk.

Disk submittal

- After the manuscript has gone through all the review and editing stages, copy the data on to a clean newly formatted disk. To avoid confusion do not copy any irrelevant files and/or back up files onto the disk.
- Apple Mac users should ensure that the disk wastebasket is empty before submitting the disk.
- Use the first-named author's name or manuscript number for the disk label and the file name.
- To avoid loss or damage in transit ensure that the disk is adequately protected and always keep a copy of the data on your computer and/or back-up disk.
- OUP does not intend to return the disk to the originator.
