

INDEX TO VOL. III

INDEX, 1949

Authors of Articles :—

- Atherton, F. R., some aspects of the organic chemistry of derivatives of phosphorus oxyacids, 146
 Barrer, R. M., molecular-sieve action of solids, 293
 Barton, D. H. R., the chemistry of the diterpenoids, 36
 Bockris, J. O'M., ionic solvation, 173
 Bolland, J. L., kinetics of olefin oxidation, 1
 Crawford, V. A., hyperconjugation, 226
 De la Mare, P. B. D., kinetics of thermal addition of halogens to organic compounds, 126
 Eley, D. D., mechanisms of hydrogen catalysis, 209
 Gibson, D. T., the terrestrial distribution of the elements, 263
 Hickling, A., the mechanism of electrode processes in aqueous solutions, 95
 Lea, F. M., the constitution of Portland cement, 82
 Leech, H. R., laboratory and technical production of fluorine and its compounds, 22
 Lythgoe, B., some aspects of pyrimidine and purine chemistry, 181
 Nyholm, R. S., recent stereochemistry of the Group VIII elements, 321
 Percival, E. G. V., carbohydrate sulphates, 369
 Riley, H. L., carbides, nitrides, and carbonitrides of iron, 160
 Staveley, L. A. K., transitions in solids and liquids, 65
 Syngé, R. L. M., naturally-occurring peptides, 245
 Topley, B., the condensed phosphates, 345
 Abietic acid, structure of, 37, 38
*neo*Abietic acid, 44
 Acetylene, exchange reactions of, 222
 hydrogenation of, 224
 δ -Acetylornithine, 256
 Adenine, synthesis of, 192
 Adenosine, 183
 Adrenocorticotrophin, 254
 Aërosporin, 260
 Agar-agar, 378
 Agathenedicarboxylic acid, structure of, 37, 49
*iso*Agathenedicarboxylic acid, 50
 Alcohols, diterpenoid, 52
 Alge, marine, polysaccharide sulphates of, 376
 Alkylbenzenes, absorption spectra and ionisation potentials of, 238
 Alkylethylenes, absorption spectra and ionisation potentials of, 237
 Alkylpyrimidines, 198
 2-Alkylthiopyrimidines, 200
 Alloys, order-disorder in, 68
 Alternating-current methods, 100
 Aluminium carbonitride, 168
 oxide, 281
 Amanitine, 258
 Ambrein, 63
 Aminopyrimidines, 201
 Ammonium halides, transitions in, 74
 Anionotropy, 242
 Anodes, carbon, 26
 Anserine, 255
 Antibiotics, 262
 Antimalarials, 182
 Antioxidants, phenolic, 9
 Arsine complexes, 341
 Atmophil, 264
 Atmosphere, 277
 Autoxidation, 6
 Bacitracin, 261
 Bacteria, peptides from, 258
 Barbituric acid, structure of, 203
 Benzene, exchange reactions of, 221
 hydrogenation of, 224
 Benzoyl peroxide, oxidation catalysis by, 6
 Biosynthesis, 184, 185
 Bistriethylphosphinedibromonickel, 333
 Bond length, hyperconjugation and, 232
 Bond orbitals, shape of, 325
 Bond orders, 231
 β -Brass, 69
 Bromide ions, catalysis of bromine addition by, 136
 Bromine, addition of, catalysed by halide ions, 135
 fourth order, 134
 third order, 130
 Calcite, effect of phosphates on precipitation of, 367
 Calcium aluminates, 93
 ferrites, 93
 oxide, 283
 silicates, 88
 Camphorene, 58
 Carbohydrate sulphates, 369
 alkaline hydrolysis of, 370
 animal, 381
 natural, 375
 Carbon monoxide, reaction of, with metals and oxides, 162
 tetrafluoride, 33
 Carbonitrides, 168
 Carbonitriding, 167

- Carbonyl compounds, reactions of, with phosphorus trichloride, 157
 Carnosine, 255
 Carrageenin, 376
 Casein phosphopeptones, 251
 Catalysis, hydrogen, mechanism of, 209
 Catira tree, resin from, 51
 Catic acid, 51
 Cells, electrochemical, fluorine, 22
 Cement, Portland, constitution of, 82
 Chalcophil, 264
 Charcoal, molecular-sieve action in, 297
 Chemisorption, theory of, 210
 Chloride ions, catalysis of bromine addition by, 135
 Chlorine fluorides, 35
 Chondroitin sulphate, 381
 Clupein, 253
 Cobalt complexes, 330, 334, 335, 337
 Complex-ion formation, 363
 Compressibility, ionic solvation and, 179
 Co-ordination numbers of Group VIII elements, 322, 326, 333, 334
 Copal, Kauri and Manila, resin acid from, 49
 Cytidine, 183
 synthesis of, 190
 Cytosine, synthesis of, 187, 197

 Deuterium halides, transitions in, 79
 overpotential of, 111
 separation from hydrogen, 311
 Deuteromethanes, transitions in, 78
 Dextropimaric acid, structure of, 37, 45
*iso*Dextropimaric acid, 48
 Diazomethane, reaction of, with dialkyl fluorophosphonates, 156
 Dienes, cyclic, absorption spectra and ionisation potentials of, 239
 Dihydrodextropimaric acid, 47
 Dihydroscleareol, 53
Dilsea edulis, galactan sulphate from, 378
 Dimethylglyoxime complexes, 335
 Dimethylcyclohexane, *perfluoro*-, 34
 Dipole moments, hyperconjugation and, 234
 Diterpenoids, chemistry of, 36

 Earth, elements in crust of, 266
 Elastomers, diffusion through, 314
 Electrode processes in aqueous solutions, 95
 Electrolytic oxidation, 120
 reduction, 120
 Elements, Group VIII, stereochemistry of, 321
 terrestrial distribution of, 263
 Elimination reactions, 244
 Entropy, ionic solvation and, 178
 Erdmann's salt, 337
 Ergobasine, 257
 Ergocornine, 257
 Ergot alkaloids, 257
 Ethylene, chemisorption of, 213
 exchange reactions of, 219
 hydrogenation of, 222
 Ethylenediamine complexes, 339
 Exchange reactions, 219
 Ferruginol, 56
 Fichtelite, 60
 Films, chemisorbed, 209
 Fluorides as fluorine carriers, 31, 35
 Fluorine cells, 22
 handling of, 31
 laboratory and technical production of, 22
 Fluorocarbons, 34
 Fossil rosins, 37
 Freons, 33
 Fucoidin, 380
 Fungi, peptides from, 256

 Galactan sulphate, 378
 Galactose sulphates, 370
 Gases, diffusion of, through metals, 309
 through organic membranes, 314
 through silica glass, 312
 Germane, transitions in, 78
 Glucose sulphates, 370
 3-Glucosidouracil, 190
 Glutathione, 254
 Gramicidins, 258
 Guanosine, 183

 Halogen acids, catalysis of halogen addition by, 140
 Halogenophosphonates, 149
 Halogenopyrimidines, 199
 Halogens, addition of, 243
 nucleophilic, 138
 table of rates of, in acetic acid, 145
 to olefins, 126
 Heats of hydrogenation, 236
 Heparin, 383
 Hinokiol, 57
 Hippuric acid, 256
 Homoretene, 38
 Hormones, pituitary, 254
 Hydrocarbons, diterpenoid, 58
 separation of, by sorbents, 307
 Hydrogen atoms, exchange reactions of, 216
 bromide, transitions in, 80
 cathodic evolution of, 107
 chemisorption of, 209
 chloride, transition in, 79
 deuteride, formation of, 215
 fluoride, anhydrous, 33
 overpotential of, 111
 separation from deuterium, 311
para-Hydrogen conversion, 214
 Hydrogenation, 222
 Hydroperoxides, 2
 decomposition of, 16
 Hydroxypyrimidines, 200
 Hyperconjugation, 226
 Hypertensin, 251
 Hypophosphoric acid, 348

 Intracrystalline sorption, 298
 Ionic mobility, 177

- Ionisation potentials, hyperconjugation and, 237
 Iridium complexes, 335
 Iron carbides, 161
 carbonitrides, 167
 compounds electronic arrangement of, 323
 nitrides, 166
 oxides, 282
 reaction of, with carbon monoxide, 163
 Isotopes, separation of, 311

 Kaurene, 59
 Ketomanoyl oxide, 54
 Kurrol salt, 357

 Lactotyrimines, 251
 Levopimaric acid, 42
 Licheniformin, 261
 Liquids, transitions in, 65
 Lithophil, 264
 Lycomarasmin, 257

 Maddrell salt, 355
 Magnesium oxide, 283
 Manganese oxides, 282
 Manoöl, 54
 Manoyl oxide, 54
 Marrubiin, 60
 Membranes, molecular-sieve properties of, 309
 organic, molecular-sieve properties of, 314
 transmitting ions, 318
 Mercaptopyrimidines, 199
 Metals, cathodic deposition and anodic dissolution of, 123
 transmission of gases through, 309
 Methane, transitions in, 78
 Methylabietin, 38
 Micro-organisms requiring purines and pyrimidines, 186
 Minerals, molecules occluded or excluded by, 304
 Miro tree, resin from, 51, 56
 Miropinic acid, 51
*iso*Miropinic acid, 51
 Molecular-sieve action, 293
 in solution, 317
 separations by, 307
 Molecules, planar configuration, 327
 tetrahedral configuration, 331
 Monolayers, mixed, 213
 Monosaccharide sulphates, 370
 Mucoitin sulphate, 383

 Nickel, chemisorption on, 212
 complexes, 329, 330, 331, 333, 336
 Niobium carbonitride, 169
 Nitriding, 167
 Nitropyrimidines, 199
 Non-metals, weathering of, 285
*iso*Noragathenecarboxylic acid, 50
*iso*Noragathenol, 50
 Nucleic acids, relation of, to purines and pyrimidines, 183

 Nucleosides, 183
 Nucleotides, 183
 Ocean, 278
 Olefin oxides, reaction of, with phosphorus trichloride, 159
 Olefinic compounds, halogen addition to, 126
 Olefins, kinetics of oxidation of, 1
 third order addition of bromine to, 130
 Oleoresins, acids from, 37
 Ornithuric acid, 256
 Orotic acid, 181
 Osmium tetroxide, 332
 Overpotential, activation, 104
 concentration, 102
 deuterium, 111
 hydrogen, 107
 metal deposition, 124
 oxygen, 116
 Oxidation of olefins, 1
 Oxides, mixed, phase equilibria in, 85
 Oxygen, anodic evolution of, 115
 chemisorption of, 212
 overpotential of, 116

 Palladium complexes, 329, 331
 Palladous chloride, 340
 Paludrine, 182
 Pantothenic acid, 255
 "Paritol", coagulation inhibitor, 384
 Pegmatites, weathering of, 289
 Penicillins, 256
 Pepsitensin, 251
 Peptides, naturally-occurring, 245
 Perchloric acid, catalysis of halogen addition by, 138
 Perfluorobenzene, 34
 Peroxides, 2
 decomposition of, 16
 Phalloidine, 258
 Phase equilibria in mixed oxides, 85
 Phenols, diterpenoid, 52
 Phosphates, condensed, 345
 surface effects of, 367
 structural formulæ, 347
 Phosphine complexes, 341
 Phosphonates, 150
 Phosphoric anhydride, 345
 Phosphorus chlorides, 155, 157
 esters, 151, 153
 halides, reactions with, 152
 hydroxy-compounds, 147
 oxyacids, organic derivatives of, 146
 Photo-oxidation, 6
 Phyllocladene, 59
*iso*Phyllocladene, 59
 Physiological action of peptides, 249
 Phytol, 52
 Pimanthrene, structure of, 37
 Pituitary hormones, 254
 Platinum complexes, 328, 330, 334, 338, 342
 Podocarpic acid, 50
 Podocarpinal methyl ether, 51

- Podocarpinol methyl ether, 51
 α -Podocarpene, 59
 δ -Podocarpene, 59
 Poisons, catalytic, in electrode processes, 111
 Polarisation and electrode kinetics, 101
 concentration, 101
 Polishing, electrolytic, 125
 Polymerisation, anionic, in anodic oxidation, 121
 Polymyxins, 260
 Polynuclear complexes, 339
 Polyphosphates, 360
 Polysaccharide sulphates, 376
 Potash, 284
 Potentials, polarisation, decay rate of, 99
 growth rate of, 97
 Propagation processes, 12
 Protamines, 252
 Proteins, peptides as models for, 246
 Prototropy, 242
 Pteridine, 181
 Pteric acid, 255
 Purine nucleosides, 191
 Purines, chemistry of, 181
 synthesis of, 191
 Pyrimidine, chemistry of, 181
 nucleosides, 190
 synthesis of, 187
 Pyrimidines, chemistry of, 194
 Quinazoline, 181
 Quinol as antioxidant, 9
 Reactions at working electrodes, 96
 Refractivity, molecular, hyperconjugation and, 240
 Resin acids, diterpenoid, 37
 Retene, structure of, 37
 Rhodium complexes, 335, 342
 Rimu tree, 60
 Rimuene, 59
 Rocks, igneous, 264
 metamorphic, 265
 sedimentary, 264
 Rosins, fossil, 37
 Rubber vulcanisates, hydrocarbon diffusion through, 315
 Ruthenium complexes, 330
 tetroxide, 332
 Salmine, 253
 Sclareol, 53
 Secretin, 254
 Siderophil, 264
 Silica glass, diffusion of gases through, 312
 Silicane, transitions in, 78
 Silicate melts, phase equilibria in, 85
 Silicon dioxide, 281
 Soda, 284
 Sodalite, 299
 Sodium ions, hydration number of, 175
 metaphosphate, 349
 glass, 358
 insoluble, 355, 357
 Sodium phosphates, condensed, nomenclature of, 351
 polymorphism of, 350
 tetrametaphosphate, 353
 trimetaphosphate, 351
 triphosphate, 360
 Solids, molecular-sieve action of, 293
 transitions in, 65
 Solutions, transmission of ions of, through solids, 317
 Solvation, ionic, 173
 numbers, table of, 180
 Solvents, non-hydroxylic, halogen addition in, 143
 Solvent transport, 176
 Sorbents, porous, molecular-sieve action in, 293
 Spectra, absorption, hyperconjugation and, 237
 Steel, case-hardening of, 167
 Stereochemistry of diterpenoids, 60
 of Group VIII elements, 321
 theory of, 323
 Strepogenin, 252
 Subtilins, 261
 Sugiol, 58
 Sulphadiazine, 182
 Sulphamethazine, synthesis of, 190
 Sulphur hexafluoride, 34
 Sulphuric acid, catalysis of halogen addition by, 138
 Tetralin, oxidation of, 20, 21
 Tetramethylplatinum, 339
 Thyrotrophin, 254
 Totara tree, wood of, 58
 Totarol, 58
 1 : 7 : 8-Trimethylphenanthrene, structure of, 37
 Triterpenoids, 63
 Tuberculin, 262
 Tyrocidines, 259
 Tyrothricin, 258
 Unsaturated compounds, exchange and hydrogenation of, 219
 hyperconjugation in, 230
 Uracil, spectrum and structure of, 203
 Uridine, 183
 Valency of Group VIII elements, 322
 Vasicine, 181
 Velocity of elementary reactions, 10
 Vitamin- B_1 , synthesis of, 197
 Vitamin- B_1 and - B_2 , 181
 Voltammetry, 96
 Vouacapenic acid, 51
 Weathering, 279
 Xanthosine, 194
 Zeolites, 293, 298
 grouping of, 302
 intracrystalline diffusion in, 314
