

**INDEX TO VOL. VI**

# INDEX, 1952

## Authors of Articles :

- Albert, A., the pteridines, 197  
Bayliss, N. S., the free-electron approximation for conjugated compounds, 319  
Bevington, J. C., the polymerisation of aldehydes, 141  
Bircumshaw, L. L., and Riddiford, A. C., transport control in heterogeneous reactions, 157  
Brown, R. D., molecular orbitals and organic reactions, 63  
Burton, H., and Prail, P. F. G., reactions of organic cations, 302  
Coward, W. A., and Davies, D. S., Sandmeyer and related reactions, 358  
Crombie, L., geometric isomerism about carbon-carbon double bonds, 101  
Evans, M. G., Hush, N. S., and Uri, N., the energetics of reactions involving hydrogen peroxide, its radicals, and its ions, 186  
Hughes, E. D., and Ingold, C. K., aromatic rearrangements, 34  
Jacobs, P. W. M., and Tompkins, F. C., ionic conductance in solid salts, 238  
Khorana, H. G., structural investigation of peptides and proteins, 340  
Page, J. E., polarography of organic compounds, 262  
Sheppard, N., and Simpson, D. M., the infra-red and Raman spectra of hydrocarbons. Part I. Acetylenes and olefins, 1  
Weedon, B. C. L., anodic synthesis with carboxylic acids, 380
- Absorption spectra, visible, of isomers, 113  
Acetaldehyde, high polymers of, 149  
Acetoxylation, anodic, 393  
Acetylenes, addition of reagents to, 128  
  infra-red and Raman spectra of, 1  
Acetylium ion, 305, 310, 311, 314  
Acids, aromatic, Kolbe reaction with, 387  
  branched-chain, electrolysis of, 384  
  carboxylic, anodic syntheses with, 380  
  polarography of, 289  
  dibasic, electrolysis of, 383  
  fatty, straight-chain, electrolysis of, 382  
  substituted, Kolbe reaction with, 388  
  unsaturated, Kolbe reaction with, 386  
Activation energies, calculation of, 247  
Acylation, 309  
Additions, stereospecific, to isomers, 124  
Aldehydes, polymerisation of, 141  
  reduction of, 285  
  unsaturated, polymers of, 155
- Alkoxylation, anodic, 393  
Alkylation, anodic, 393  
Amino-acids, analysis of, 341  
  D-Amino-acids in naturally-occurring peptides, 356  
Amino-groups, free, identification of, 343  
Amperometric titration, 274  
Analysis, polarographic, 272  
Anilines, alkyl-, rearrangements of, 43  
Anodic reactions, theories of, 394  
  syntheses with carboxylic acids, 380  
Aromatic rearrangements, 34  
  electrophilic, 35  
  intramolecular, 48  
  nucleophilic, 45  
  substitution reactions, 78  
Azulene, 80
- Bart reaction, 363  
Benzene derivatives, 83  
  fluoro-2:4-dinitro-, for identification of amino-groups, 344  
  free-electron orbitals for, 330  
Benzidine rearrangement, 53  
Benzoylium ion, 305, 310, 314  
Benzyl cation, 317  
Bond orders, 93  
Butaldehyde, high polymers of, 152  
Carbon-carbon double bonds, geometrical isomerism about, 101
- Carbonium ion, 302, 308, 310, 312, 313, 318  
Carboxyl groups, identification of, 346  
Catalysts for equilibration of geometrical isomers, 139  
  mechanism of action of, 370  
Cationisation, 309  
Charge densities, 92  
Chromatography of pteridines, 199  
  partition, of amino-acids and peptides, 349  
Chrysopterin, 231  
Citrovorum factor, 234  
Colour centres in ionic crystals, 252  
Compounds, conjugated, free-electron approximation for, 319  
Condensation of geometrical isomers, 135  
Configuration, geometrical, 109  
Copper in Sandmeyer reaction, 370  
Crystals, ionic, vacancies in, 250  
Crystallography, X-ray, of isomers, 112  
Cyanines, 326  
Cyclisation, intramolecular, 122
- Dialdehydes, polymerisation of, 154

- Diazoamino-compounds, rearrangements of, 39  
 Diazo-compounds, addition of, 91  
 Diazonium compounds, catalysed decomposition of, 378  
   group, replacement reactions with, 358, 379  
 Diels-Alder reaction, 86  
 Diphenylene, 79  
 Dipole moments of geometrical isomers, 118  
 Dipteridylmethines, 223  
 Dipyrindyl-violet, 335  
 Doebner reaction, 135  
  
 Electrodes, micro-, platinum, 270  
 Electron in a box, 320  
 Elimination from geometrical isomers, 130  
 Enantiomorphs, resolvability of isomers into, 122  
 Enzymes, inhibition of, by pteridines, 237  
   proteolytic, classification and specificity of, 355  
 Erythropterin, 231  
 Ethers, benzyl, fission of, 317  
  
 Fluid flow, dynamics of, 165  
 Folic acid SF, 234  
 Formaldehyde polymers, 144  
   depolymerisation of, 148  
 Free-electron theory, 322, 333  
 Friedel-Crafts reaction, 314  
 Fulvalene, 80  
  
 Glutathione, structure of, 348  
 Glyoxal, and its methyl analogue, polymerisation of, 154  
 Gramicidin-S, structure of, 350  
 Growth inhibition and promotion, 235, 236  
  
 Half-esters, Kolbe reaction with, 383, 384  
 Halogen organic compounds, polarography of, 291  
 Halogeno-amines, rearrangements of, 35  
 Heptalene, 80  
 Heterocyclic systems, 81  
 Hydrocarbons, alternant, 78  
   unsaturated, reduction of, 282  
 Hydrogen peroxide, energetics of reactions involving, 186  
 Hydroxylamines, rearrangements of, 45  
  
 Ichthyopterin, 231  
 Infra-red spectra, acetylene, and its substituted derivatives, 8  
   allenes, 33  
   ethylene and its substituted derivatives, 17  
   hydrocarbons, 1  
   isomers, 116  
   pteridines, 211  
 Insulin, structure of, 350  
 Ionic conductance in solid salts, 238  
 Isolated molecule approximation, 74  
  
 Isomers, geometrical, nomenclature of, 109  
   preparation of, 127  
   properties of, 110  
   stability of, 104  
 Isomerism, geometric, about carbon-carbon double bonds, 101  
*cis-trans*-Isomerism, 91  
  
 Ketens, polymerisation of, 155  
 Ketones, polymers of, 154  
   reduction of, 287  
 Kolbe reaction, 380, 394  
  
*Lactobacillus casei* fermentation factor, 232  
 Leucopterin, 231  
 Leucovorin, 234  
 Localisability effect, 76  
 Localisation energies, 94  
   theory, 76  
  
 Mass-transfer, dimensional analysis of, 171  
   quantitative treatment of, 167  
 Meerwein reaction, 365, 377  
 Metals, oxidation of, 258  
 Molecular rearrangements, 313  
 Molecules, polyatomic, vibration frequencies of, 6  
  
 Naphthalene, states of, 333  
 Nernst theory, 158  
 Nitracidium ion, 307  
 Nitramines, rearrangements of, 48  
 Nitro-compounds, polarography of, 294  
 Nitronium ion, 307  
 Nitrosamines, rearrangements of, 42  
  
 Olefins, infra-red and Raman spectra of, 1  
 Orbitals, free-electron, 328  
   molecular, and organic reactions, 63  
 Organic cations, reactions of, 302  
   compounds, polarography of, 262  
 Organo-metallic compounds, polarography of, 300  
 Osmium tetroxide, oxidation by, 89  
 Oxidation-reduction, polarography of, 277  
   potentials, 195  
 Oxygen ions, heat and free energy of formation of, 195  
 Ozone, reactions of, involving ions and radicals, 195  
 Ozonolysis, 90  
  
 Pentalene, 80  
 Peptides, degradation of, 351  
   hydrolysis of, 347  
   structure of, 340  
 Per-acids, oxidation with, 91  
 Perkin reaction, 135  
 Peroxides, organic, reduction of, 285  
 Perturbability effect, 76  
 Phenazine, 1-hydroxy-, polarograms for, 278  
 Polarisation, anomalous dielectric, 252  
 Polarograph, 263

- Polarographic currents, 265  
Polarography, 262  
Polyenes, 325  
Polymerisation, ionic, 315  
  mechanism of, 153  
Polymethines, 326  
Polyoxymethylene polymers, 149  
Prandtl power, 175  
Proteins, hydrolysis of, 347  
  structure of, 340  
Pteridines, 197  
  amino-, reactions of, 202, 215  
  chloro-, reactions of, 221  
  growth effects of, 234  
  hydroxy-, reactions of, 203, 218  
  4-hydroxy-, metal complexes with, 205  
  mercapto-, reactions of, 220  
  methoxy-, reactions of, 219  
  naturally occurring, 231  
  reactions of, 211-215  
  synonyms for, 233  
  synthesis of, 223  
Pterioic acid, 232  
Pterorhodin, 231  
Purity criteria, 198  
Pyridine, 81  
  
Quinol-benzoquinone polarograms, 277  
Quinoline, 82  
  
Raman spectra, acetylene, and its substituted derivatives, 8  
  allenes, 33  
  ethylene, and its substituted derivatives, 17  
  hydrocarbons, 1  
  isomers, 116  
Reactions, chemically-controlled, 176  
  heterogeneous, classification of, 175  
  transport control in, 157  
  intermediate, 177  
  of organic cations, 302  
  organic, and molecular orbitals, 63  
  reductive, 369  
  
Reactivity, changes in, due to structural changes, 92  
Rearrangements of geometrical isomers, 136  
Replacements at a trigonal carbon atom, 137  
Rhizopterin, 231  
Ring systems with double bonds, scission of, 135  
  
Salts, solid, ionic conductance in, 238  
Sandmeyer reaction, 358  
Solids, ionic, photolysis of, 256  
  reactions between, 260  
  thermal decomposition of, 257  
Solvents for polarography, 268  
Spectra, pteridines, 206  
Stereomutation, 139  
  of geometrical isomers, 106  
Stirring coefficient, 160  
Sulphamic acids, rearrangements of, 51  
  
Temperature coefficient of reactions, 163  
  conductance and, 240  
"Teropterin", 231  
Thiele reaction, 316  
Thyroxine, polarogram for, 293  
Tyrosine, 3:5-di-iodo-, polarogram for, 293  
  
Ultra-violet spectra, isomers, 113  
  pteridines, 206  
Urothion, 231  
  
Valency, free, 94  
Vibration frequencies of polyatomic molecules, 6  
  
Würster's blue, 335  
Xanthopterin, 198, 231
