# Quarterly Reviews

---

No 1 Vol 21 1967

	Page
<b>Organic Chemistry of Periodates</b> By B. Sklarz	3
<b>The Mechanism of Rusting</b> By U. R. Evans, F.R.S.	29
<b>The Chemistry and Biological Function of Isoalloxazines (Flavines)</b> By G. R. Penzer and G. K. Radda	43
<b>Vibration-Vibration Energy Transfer in Gaseous Collisions</b> By J. D. Lambert	67
<b>The Hydrated Electron</b> By D. C. Walker	79
<b>Molecular Polyhedra of High Co-ordination Number</b> By E. L. Muetterties and C. M. Wright	109

**The Chemical Society London**

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W.1. Such preliminary communications should be accompanied by an outline of the ground to be covered rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum
