
Quarterly Reviews

No 2 Vol 21 1967

	Page
Molecular Hyperpolarisabilities By A. D. Buckingham and B. J. Orr	195
Photochemical Behaviour of Transition-metal Complexes By E. L. Wehry	213
The Cephalosporin C Group By E. P. Abraham	231
Hydrogen Abstraction in the Liquid Phase by Free Radicals By R. S. Davidson	249
Grignard Reagents. Compositions and Mechanisms of Reaction By E. C. Ashby	259

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W.1. Such preliminary communications should be accompanied by an outline of the ground to be covered rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum
