No 1 Vol 22 1968

	Page
<b>Hyponitrites</b>	
By M. N. Hughes	1
<b>Equivalence of Nuclei in High-resolution Nuclear Magnetic Resonance Spectroscopy</b>	
By M. van Gorkom and G. E. Hall	14
<b>The Tungsten Bronzes and Related Compounds</b>	
By P. G. Dickens and M. S. Whittingham	30
<b>Electron Spin Resonance Studies of the Triplet State</b>	
By Colin Thomson	45
<b>The Application of High Resolution Mass Spectroscopy to Organic Chemistry</b>	
By G. W. A. Milne	75

**The Chemical Society London**

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W.1. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum
