
Quarterly Reviews

No 3 Vol 22 1968

	Page
Valence-shell Expansion in Sulphur Heterocycles By W. G. Salmond	253
The Study of Ion-Solvent and Ion-Ion Interactions by Magnetic Resonance Techniques By J. Burgess and M. C. R. Symons	276
The Mass Spectra of Amino-acid and Peptide Derivatives By J. H. Jones	302
Mass Spectra of Organometallic Compounds By D. B. Chambers, F. Glockling, and J. R. C. Light	317
The Application of the Woodward-Hoffmann Orbital Symmetry Rules to Concerted Organic Reactions By G. B. Gill	338
Molecular Rearrangements Related to the Claisen Rearrangement By A. Jefferson and F. Scheinmann	391

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum
