
Quarterly Reviews

No 4 Vol 22 1968

	Page
TILDEN LECTURE	
The Photochemistry of Some Allylic Compounds	
By R. C. Cookson	423
Chemistry of Tetracyclines	
By D. L. J. Clive	435
Iron, Cobalt, and Nickel Complexes having Anomalous Magnetic Moments	
By E. Kent Barefield, D. H. Busch, and S. M. Nelson	457
Macromolecular Structure and Properties of Ribonucleic Acids	
By R. A. Cox	499
Isopoly-vanadates, -niobates, and -tantalates	
By M. T. Pope and B. W. Dale	527
Decomposition Reactions of Radicals	
By J. A. Kerr and A. C. Lloyd	549
The Reactions of Hydrated Electrons with Inorganic Compounds	
By M. Anbar	579

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
