
Quarterly Reviews

No 1 Vol 23 1969

	Page
Mechanism of Action and Specificity of Proteolytic Enzymes	
By Andrew Williams	1
Kinetics and Mechanism of Metal-ion Complex Formation in Solution	
By A. McAuley and J. Hill	18
The Chemistry of Arylhydrazones	
By John Buckingham	37
Starch Biosynthesis	
By R. Geddes	57
Lasers	
By W. J. Jones	73
The Chemistry and Biochemistry of Phenolic Glycosides	
By Shirley M. Hopkinson	98

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
