	Page
Some Problems Concerning Biological C-Alkylation Reactions and Phytosterol Biosynthesis	
By Edgar Lederer	453
The Photocyclisation of Stilbene Analogues	
By E. V. Blackburn and C. J. Timmons	482
Mechanisms for Nucleophilic and Photonucleophilic Aromatic Substitution Reactions	
By Francesco Pietra	504
The Clemmensen Reduction of Difunctional Ketones	
By J. G. St. C. Buchanan and P. D. Woodgate	522
Thiothiophthene No-bond Resonance Compounds	
By E. Klingsberg	537
The Faraday Effect	
By P. N. Schatz and A. J. McCaffery	552

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum.

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
