
Quarterly Reviews

No 1 Vol 24 1970

	Page
Transition-metal Complexes of Some Perfluoro-ligands	
By Sir Ronald Nyholm, F.R.S.	1
Molecular Complexes of Water in Organic Solvents and in the Vapour Phase	
By Sherril D. Christian, Ahmed A. Taha, and Bruce W. Gash	20
Photochemical Reactions in Natural Product Synthesis	
By P. G. Sammes	37
The Co-ordination of Ambidentate Ligands	
By A. H. Norbury and A. I. P. Sinha	69
Wave Functions for Small Molecules based on Linear Combinations of Atomic Orbitals	
By R. G. Clark and E. Theal Stewart	95
Developments in the Chemistry of Diazo-alkanes	
By G. W. Cowell and A. Ledwith	119

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum.

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
