
Quarterly Reviews

No 2 Vol 24 1970

	Page
Structure and Properties of Aqueous Salt Solutions By M. J. Blandamer	169
The Thermal Decomposition of Hydrrous Layer Silicates and their Related Hydroxides By N. H. Brett, K. J. D. MacKenzie, and J. H. Sharp	185
The Stereochemistry of Polysulphides By R. Rahman, S. Safe, and A. Taylor	208
The Study of Simple Liquids by Computer Simulation By I. R. McDonald and K. Singer	238
Volatile Compounds of the Hydrides of Silicon and Germanium with Elements of Groups V and VI By John E. Drake and Chris Riddle	263
Trimethylenemethane and Related α, α'-Disubstituted Isobutenes By Francis Weiss	278
Organothallium Chemistry By A. G. Lee	310

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum.

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
