
Quarterly Reviews

No 3 Vol 24 1970

	Page
TILDEN LECTURE	
The Biochemistry of Sodium, Potassium, Magnesium, and Calcium	
By R. J. P. Williams	331
CENTENARY LECTURE	
Roads to Corrins	
By A. Eschenmoser	366
The van der Waals Fluid: A Renaissance	
By M. Rigby	416
The Separation of Polar, Steric, and Resonance Effects in Organic Reactions by the Use of Linear Free Energy Relationships	
By J. Shorter	433
Application of Computers in Chemical Analysis: Amino-acid Analysis and Sequence Determination	
By B. Sheldrick	454

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V OBN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4 10s. 0d. per annum.

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
