
Quarterly Reviews

No 2 Vol 25 1971

	Page
FARADAY LECTURE	
Spectra and Structures of Molecular Ions	
By G. Herzberg	201
Properties and Reactions of Clean Metal Surfaces	
By R. P. H. Gasser	223
Synthesis of Heterocyclic Quinones	
By I. Baxter and B. A. Davis	239
The Kinetics of Hydrocarbon Autoxidation in the Liquid Phase	
By James Betts	265
Structural Aspects of Co-ordinated Nitrate Groups	
By C. C. Addison, N. Logan, S. C. Wallwork, and C. D. Garner	289
Methods of Optical Resolution	
By P. H. Boyle	323

The Chemical Society London

Quarterly Reviews contains articles by recognised authorities on selected topics from general, physical, inorganic, and organic chemistry. The Journal and Annual Reports interest primarily the research worker: Quarterly Reviews is designed for a wider range of readers. It is intended that each review article shall be of interest to chemists generally and not only to workers in the particular field being reviewed.

The submission of reviews for publication is welcomed, but intending authors are advised to write in the first place to the Editor, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN. Such preliminary communications should be accompanied by an outline of the ground to be covered (about two quarto pages) rather than by the completed manuscript.

Price to non-fellows £4.50 per annum.

The Chemical Society—Endowed Lectures.

The Council of The Chemical Society has decided that the Endowed Lectures of the Society shall, in future, be published in full in *Quarterly Reviews* to ensure that there will be a permanent record. These will be in addition to the normal Review articles.
