The Chemical Society London

Chemical Society Reviews

As from January 1972, arising from the amalgamation of The Societies, the review periodicals *Quarterly Reviews* and *RIC Reviews* will be replaced by one new review publication,

Chemical Society Reviews

The new periodical will not be simply a mixture of its two predecessors. It will, however, constitute a logical continuation of both, and will aim to provide articles of interest to a wide readership. The articles will range over the whole of chemistry and its interfaces with other disciplines, and there will be a conscious attempt to provide consistency of depth of treatment, so that each article is of interest to chemists in general, and not merely to those with a specialist interest in the subject being reviewed.

Chemical Society Reviews will appear quarterly, and should comprise approximately 30 articles (600pp) per annum. Although the majority of articles will be specially commissioned, the Society will always be prepared to consider offers of articles for publication. In such cases a short synopsis should be submitted rather than the completed article, to The Editor, Reports and Reviews Section, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN.

Members of The Chemical Society will have an opportunity to subscribe to *Chemical Society Reviews* at £2.00 per annum; they should place their orders on their Annual Subscription renewal forms in the usual way.

Non-members may order *Chemical Society Reviews* (£8.00 per annum; remittance with order) from:

The Publications Sales Officer, The Chemical Society, Blackhorse Road, Letchworth, Herts., SG6 1HN, England.
