
Chemical Society Reviews

Vol 2 No 1 1973

	Page
ROBERT ROBINSON LECTURE	
The Logic of Working with Enzymes	
By J. W. Cornforth, F.R.S.	1
The Growth of Computational Quantum Chemistry from 1950 to 1971	
By G. G. Hall	21
Total Syntheses of Prostanoids	
By P. H. Bentley	29
Lanthanide Shift Reagents in Nuclear Magnetic Resonance Spectroscopy	
By B. C. Mayo	49
Insect Attractants of Natural Origin	
By D. A. Evans and C. L. Green	75
The Chemistry of Transition-metal Carbene Complexes and their Role as Reaction Intermediates	
By D. J. Cardin, B. Çetinkaya, M. J. Doyle, and M. F. Lappert	99

The Chemical Society London

Chemical Society Reviews

Chemical Society Reviews appears quarterly and comprises approximately 25 articles (*ca.* 600 pp) per annum. It is intended that each review article shall be of interest to chemists in general, and not merely to those with a specialist interest in the subject under review. The articles range over the whole of chemistry and its interfaces with other disciplines.

Although the majority of articles are specially commissioned, the Society is always prepared to consider offers of articles for publication. In such cases a short synopsis, rather than the completed article, should be submitted to The Editor, Reports and Reviews Section, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN.

Members of The Chemical Society may subscribe to *Chemical Society Reviews* at £2.00 per annum; they should place their orders on their Annual Subscription renewal forms in the usual way.

Non-members may order *Chemical Society Reviews* (£8.00 per annum; remittance with order) from:

The Publications Sales Officer, The Chemical Society, Blackhorse Road, Letchworth, Herts., SG6 1HN, England.
