
Chemical Society Reviews

Vol 4 No 3 1975

	Page
FARADAY LECTURE	
The Electron as a Chemical Entity	
By F. S. Dainton	323
Bile Pigments	
By M. F. Hudson and K. M. Smith	363
TATE AND LYLE LECTURE	
Spin-Lattice Relaxation: A Fourth Dimension for Proton N.M.R. Spectroscopy	
By L. D. Hall	401
Transition Metal Complexes of Synthetic Macrocyclic Ligands	
By L. F. Lindoy	421
Co-ordination Chemistry of Aryldiazonium Cations: Aryldiazeno (Arylazo) Complexes of Transition Metals, and the Aryldiazeno-Nitrosyl Analogy	
By D. Sutton	443
The Application of Electrochemical Techniques to the Study of Homogeneous Chemical Reactions	
By D. Pletcher	471

The Chemical Society London

Chemical Society Reviews

Chemical Society Reviews appears quarterly and comprises approximately 25 articles (*ca.* 600 pp) per annum. It is intended that each review article shall be of interest to chemists in general, and not merely to those with a specialist interest in the subject under review. The articles range over the whole of chemistry and its interfaces with other disciplines.

Although the majority of articles are intended to be specially commissioned, the Society is always prepared to consider offers of articles for publication. In such cases a short synopsis, rather than the completed article, should be submitted to The Editor, Reports and Reviews Section, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN.

Members of the Chemical Society may subscribe to *Chemical Society Reviews* at £3.00 per annum; they should place their orders on their Annual Subscription renewal forms in the usual way.

Non-members may order *Chemical Society Reviews* for £10.00 per annum (remittance with order) from:

The Publications Sales Officer, The Chemical Society, Blackhorse Road, Letchworth, Herts., SG6 1HN, England.
