---

Vol 4 No 3 1975

“Co-ordination Chemistry of Aryldiazonium Cations” by D. Sutton.

Section 2 Nomenclature (pp. 445, 446): the *proposed* I.U.P.A.C. rule, whereby the ArNN ligand was named *aryldiazonato*, has not been adopted. Instead, the I.U.P.A.C. Commission now recommends reversion to the original *aryldiazenido* terminology.
