
Chemical Society Reviews

Vol 8 No 2 1979

	Page
Synthesis and Synthetic Utility of Halolactones By M. D. Dowle and D. I. Davies	171
Compartmental Ligands: Routes to Homo- and Hetero-dinuclear Complexes By U. Casellato, P. A. Vigato, David E. Fenton, and M. Vidali	199
THE TATE AND LYLE CARBOHYDRATE CHEMISTRY AWARD LECTURE Transition-metal Oxide Chelates of Carbohydrate-directed Macromolecules By J. F. Kennedy	221
Surface Modified Electrodes By K. D. Snell and A. G. Keenan	259
RESOURCES CONSERVATION BY NOVEL BIOLOGICAL PROCESSES	
I Grow Fats from Wastes By C. Ratledge	283
II The Use of Microbes in the Petrochemical Industry By H. Dalton	297
III Utilization of Agricultural and Food Processing Wastes containing Carbohydrates By A. J. Forage	309

The Chemical Society London

Chemical Society Reviews

Chemical Society Reviews appears quarterly and comprises approximately 25 articles (ca. 500 pp) per annum. It is intended that each review article shall be of interest to chemists in general, and not merely to those with a specialist interest in the subject under review. The articles range over the whole of chemistry and its interfaces with other disciplines.

Although the majority of articles are intended to be specially commissioned, the Society is always prepared to consider offers of articles for publication. In such cases a short synopsis, rather than the completed article, should be submitted to The Managing Editor, Books and Reviews Section, The Chemical Society, Burlington House, Piccadilly, London, W1V 0BN.

Members of the Chemical Society may subscribe to *Chemical Society Reviews* at £6.00 per annum; they should place their orders on their Annual Subscription renewal forms in the usual way.

Non-members may order *Chemical Society Reviews* for £16.00 (\$33) per annum (remittance with order) from:

The Publications Sales Officer, The Chemical Society, Distribution Centre, Blackhorse Road, Letchworth, Herts., SG6 1HN, England.
