Chemical Society Reviews

Chemical Society Reviews appears quarterly and comprises approximately 20 articles (ca. 500 pp) per annum. It is intended that each review article shall be of interest to chemists in general, and not merely to those with a specialist interest in the subject under review. The articles range over the whole of chemistry and its interfaces with other disciplines.

Although the majority of articles are intended to be specially commissioned, the Society is always prepared to consider offers of articles for publication. In such cases a short synopsis, rather than the completed article, should be submitted to The Managing Editor, Books and Reviews Section, The Royal Society of Chemistry, Burlington House, Piccadilly, London, W1V 0BN.

Members of the Royal Society of Chemistry may subscribe to *Chemical Society Reviews* at £7.50 per annum (beginning 1981, £10.50 per annum); they should place their orders on their Annual Subscription renewal forms in the usual way.

Non-members may order *Chemical Society Reviews* for £22.00 (\$50) per annum [beginning 1981, £31 (\$78) per annum] (remittance with order) from:

The Publications Sales Officer, The Royal Society of Chemistry, Distribution Centre, Blackhorse Road, Letchworth, Herts., SG6 1HN, England.

Note to subscribers. *During 1980 the publication dates of the four issues recovered to an appreciable extent compared with those of the 1979 issues, but regrettably the intention to revert to the usual quarterly dates by the end of 1980 has not been fully realised. Again shortages of articles have bedevilled production, but steps are being taken to rectify this situation by the setting up, during 1981, of an Editorial Board.*
