

**NEW in Section A  
SOLID STATE CHEMISTRY**

# Do you need to keep informed of developments within and outside your field of specialisation?

You should subscribe to . . .

## **ANNUAL REPORTS ON THE PROGRESS OF CHEMISTRY**

**Annual Reports**, available in 3 volumes, provides indispensable critical coverage of significant advances in the major areas of chemistry:

Section A : Inorganic Chemistry  
Section B : Organic Chemistry  
Section C : Physical Chemistry

- Important background reading
- Essential reference source
- Key journal for lecturers etc

### **Subscription Details:**

Vol. 88 1991 – to be published Autumn 92

	A	B	C	All 3 Vols
EC	£79	£89	£76	£220
USA	\$176	\$190	\$169	\$478
Canada (plus GST)	£93	£105	£90	£260
Rest of World	£89	£100	£86	£248

**Annual Reports will play a vital role in your personal library – don't be without it.**

For further information please complete and return the attached enquiry form.

## NEW SERIES • NEW WALLCHART

### The Origins of Organic Chemistry 1800–1900

By Professor C A Russell

#### History of Chemistry Wallcharts Series

*Produced by the Royal Society of Chemistry in association with the Open University History of Chemistry Research Group*

#### A New Collection of Colourful Wallcharts

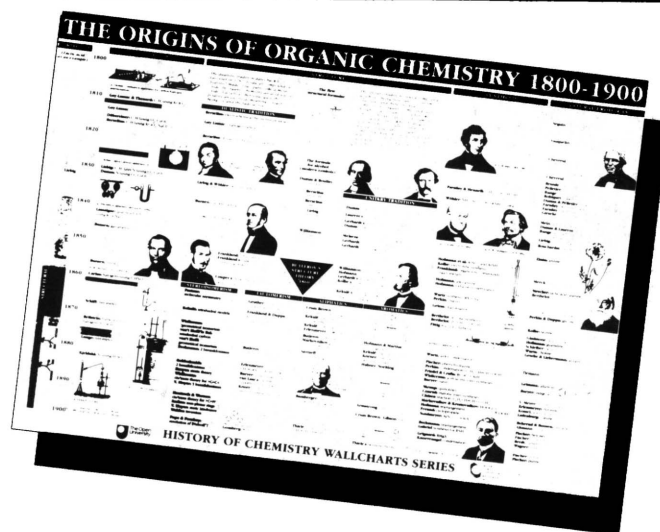

The **History of Chemistry Wallcharts** is an important new series of illustrated posters, which will provide an attractive and informative visual summary of key developments in specific areas of chemistry. In full colour, they will illuminate major advances in the field, putting present day chemistry in its historical context.

#### The First in the Series

**The Origins of Organic Chemistry 1800–1900** is the first wallchart to be produced in the series and illustrates how the increasingly detailed knowledge of organic composition gradually unfolded over the last century.

It traces the development of formulae from the simple empirical to the more complex steric and highlights the inter-relationship between analysis, synthesis and structure.

**The Origins of Organic Chemistry 1800–1900** is arranged in columns, colour coded to relate to the different subject areas covered, and has a key to indicate where information has relevance to another column. It is attractive, clearly laid out and informative, making it ideal for anyone with an interest in chemistry, whether in an academic or a professional environment.

#### Essential to brighten your wall!

**The Origins of Organic Chemistry 1800–1900**, and others in the series, will be an essential acquisition for educational establishments worldwide, including schools, polytechnics, colleges and universities. In addition, they are a must for museums, libraries, and any individual with a general interest in chemistry who wishes to brighten a dull office or study wall!

Full Colour Size 640 × 900 mm  
ISBN 0 85186 440 6 Published April 1992  
Price £4.95 (plus VAT in the UK only)

There is no RSC Members Discount on these wallcharts.

The second wallchart in the series will be:

#### The Chemical Atomic and Molecular Theory 1800–1900

By N Coley

ISBN 0 85186 450 3  
Price £4.95 (plus VAT in the UK only)  
Due Autumn 1992

Information  
Services

**To Order, Please write to the:**

Royal Society of Chemistry, Turpin Distribution Services Limited, Blackhorse Road, Letchworth, Herts SG6 1HN, United Kingdom.  
or telephone (0462) 672555 quoting your credit card details. We accept Access/Visa/MasterCard/Eurocard.

Turpin Distribution Services Limited is wholly owned by the Royal Society of Chemistry.

**For information on other books and journals, please write to:**

Royal Society of Chemistry, Sales and Promotion Department, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, United Kingdom.

**RSC Members should obtain members prices and order from:**

The Membership Affairs Department at the Cambridge address above.
