Now Available**

# ONLINE ACCESS TO THE JOURNALS OF THE ROYAL SOCIETY OF CHEMISTRY

Keeping up-to-date with the chemical literature is becoming an increasingly more difficult task as the volume of published material continues to grow each year. Manual manipulation of this data can be tedious and time-consuming while searching may not be as accurate nor as comprehensive as desired. Whereas online searching is faster and more complete than manual searching.

**The following RSC journals are available online:**

- Perkin Transactions 1 and 2
- Dalton Transactions
- Faraday Transactions
- Faraday Discussions
- Chemical Communications
- Mendeleev Communications
- The Analyst
- Journal of Analytical Atomic Spectrometry
- Journal of Chemical Research
- Journal of Materials Chemistry
- Chemical Society Reviews
- Natural Product Reports

The main primary journals of the Royal Society of Chemistry are searchable online as part of the **Chemical Journals Online (CJO)** family of full-text files available via STN International.

## MULTIFILE SEARCHING - NEW FEATURE

A new feature, multifile searching, has been introduced to the CJO database range. This enables the user to search simultaneously in a number of different files, making searching easier and faster than before.

**RSC journals online is an invaluable aid for chemists, researchers and information specialists.**

# NEW PUBLICATION

## CONTEMPORARY ORGANIC SYNTHESIS

In January 1994 the Royal Society of Chemistry will be launching a new critical reviews journal entitled **Contemporary Organic Synthesis**. It will contain assessments of reactions, reagents, strategies and designs, and provide up-to-date information on methodology, selectivity and efficiency in contemporary organic synthesis.

Coverage of specifically defined areas will be over a minimum of twelve months, but other more specialized areas will be covered every two or three years.

This new publication will serve all who face the problems of preparing organic compounds and will become an essential reference journal for the experienced practitioner who wants to stay ahead in the field of organic synthesis.

***For further information and a free sample copy  
please complete and return the slip below.***

Please send me further information on **Contemporary Organic Synthesis** and a free sample copy when available.
