Pages 213–292

August 1993

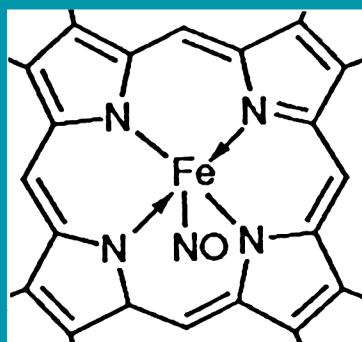

Catalytic Antibodies: Mechanistic and Practical Considerations

By Jon D. Stewart and Stephen J. Benkovic 213

Catalysis by Metal Ions in Reactions of Crown Ether Substrates

By R. Cacciapaglia and L. Mandolini 221

The Physiological Role of Nitric Oxide

By Anthony R. Butler and D. Lyn H. Williams 233

Cholaphanes *et al.*; Steroids as Structural Components in Molecular Engineering

By Anthony P. Davis 243

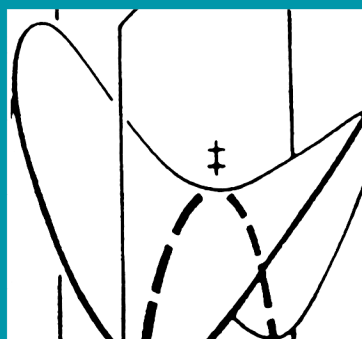

Interactions of Metal Ions with Nucleotides and Nucleic Acids and their Constituents

By Helmut Sigel 255

The Lower Oxidation States of Indium

By Dennis G. Tuck 269

$$= \frac{px_B}{(x_A + px_B)} \Delta \Delta H_{12}^\ddagger + \left\{ \frac{px_B}{(x_A + px_B)} \right\} (an +$$

Interplay of Theory and Experiment in the Determination of Transition-state Structure

By Ian H. Williams 277

Thermodynamics of Solvation in Mixed Solvents

By W. Earle Waghorne 285

Chemical Society Reviews

Editorial Board

Professor H. W. Kroto FRS (Chairman)	University of Sussex
Professor M. J. Blandamer	University of Leicester
Dr. A. R. Butler	University of St. Andrews
Dr. E. C. Constable	University of Cambridge
Professor B. T. Golding	University of Newcastle upon Tyne
Professor M. Green	University of Bath
Professor D. M. P. Mingos FRS	Imperial College London
Professor J. F. Stoddart	University of Birmingham

Consulting Editors

Dr. G. G. Balint-Kurti	University of Bristol
Professor S. A. Benner	Swiss Federal Institute of Technology, Zürich
Dr. J. M. Brown	University of Oxford
Dr. J. Burgess	University of Leicester
Dr. N. Cape	Institute of Terrestrial Ecology, Lothian
Professor A. Hamnett	University of Newcastle upon Tyne
Dr. T. M. Herrington	University of Reading
Professor R. Hillman	University of Leicester
Professor R. Keese	University of Bern
Dr. T. H. Lilley	University of Sheffield
Dr. H. Maskill	University of Newcastle upon Tyne
Professor Dr. A. de Meijere	University of Göttingen
Professor J. N. Miller	Loughborough University of Technology
Professor S. M. Roberts	University of Exeter
Professor B. H. Robinson	University of East Anglia
Dr. A. J. Stace	University of Sussex

Staff Editors

Mr. K. J. Wilkinson	Royal Society of Chemistry, Cambridge
Dr. J. A. Rhodes	Royal Society of Chemistry, Cambridge
Dr. M. Sugden	Royal Society of Chemistry, Cambridge

It is intended that **Chemical Society Reviews** will have the broad appeal necessary for researchers to benefit from an awareness of advances in areas outside their own specialities. Deliberate efforts will be made to solicit authors and articles from Europe which present a truly international outlook on the major advances in a wide range of chemical areas. It is hoped that it will be particularly stimulating and instructive for students planning a career in research. The articles will be succinct and authoritative overviews of timely topics in modern chemistry.

In line with the above, review articles will not be overly comprehensive, detailed, or heavily referenced (*ca.* 30 references), but should act as a springboard to further reading. In general, authors, who will be recognized experts in their fields, will be asked to place any of their own work in the wider context. Review articles must be *short*, around 6–8 journal pages in extent. In consequence, manuscripts should not exceed 20–30 A4/American quarto sheets, this length to include text (in double line spacing), tables, references, and artwork. An Instruction to Authors leaflet is available from the Senior Editor (Reviews).

Although the majority of articles are intended to be specially commissioned, the Society always considers offers of articles for publication. In such cases a short synopsis, rather than the completed article, should be submitted to the Senior Editor (Reviews), Books and Reviews Department, The Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF.
