

**ENGLISH
EDITION**

RUSSIAN CHEMICAL REVIEWS

Rapid publication • High quality translation

Russian Chemical Reviews is an authoritative, specialist publication, providing easy access to reviews of important new work from Russia and the other countries of the former USSR. It is the English edition of the monthly review journal *Uspekhi Khimii*, published by the Russian Academy of Sciences.

Each issue is approximately 100 pages in length and usually contains five or six specially commissioned review articles. These reviews cover most aspects of modern chemistry, particularly:

- structure of molecules and quantum chemistry
- coordination chemistry
- analytical chemistry
- chemical physics
- physical chemistry including catalysis
- organic and organometallic chemistry
- chemistry of macromolecules
- biochemistry and bioorganic chemistry
- materials chemistry

Written by experts, the reviews are specially translated for **Russian Chemical Reviews**, edited to the highest possible standard, and published as soon as possible after the Russian-language original. In this way English-speaking scientists from around the world have rapid access to valuable new work originally published in Russian.

Russian Chemical Reviews gives you a simple and straightforward route to the achievements of Russian chemistry and offers:

- High-quality translation of the Russian originals
- Increased speed of publication
- Authoritative editorial control in Moscow and the United Kingdom under the supervision of the Russian Academy of Sciences and The Royal Society of Chemistry

1995 PRICE (12 issues)

NEW & RECENT BOOKS FROM THE ROYAL SOCIETY OF CHEMISTRY

Ref No 1098

Container Molecules and their Guests

By Donald J. Cram and Jane M. Cram, *University of California*

Monographs in Supramolecular Chemistry - Series Editor: J. Fraser Stoddart, FRS, *University of Birmingham, UK*

This volume covers the evolution of host-guest complexation chemistry in the minds and hands of Nobel Prize winner Donald Cram and his co-workers at UCLA, over the 25-year period from 1970-1994. It deals with the fundamental principles and objectives that govern this rapidly developing subject and illustrates the emergence of a new field of biomimetic chemistry. The book demonstrates how a number of techniques, such as molecular modeling, synthesis, crystal structure, NMR solution structure and mass spectral structure determinations can be combined to develop a new branch of organic chemistry. It discusses the chemistry of completely new families of complexes - the carceplexes, hemicarceplexes and velcralexes - and reviews for the first time the uses of the interiors of hemicarceplexes as a new phase for carrying out chemical reactions and for protecting unstable species. Many will be inspired by the wonderful achievements that Cram and his team have made in this exciting branch of supramolecular chemistry.

Hardcover **xiv + 224 pages** **ISBN 0 85186 972 6** **1994** **Price £49.50**

Ref No 1051

Medicinal Chemistry: Principles and Practice

Edited by Frank D. King, *SmithKline Beecham Pharmaceuticals, Harlow, UK*

This book introduces the principles and practices of modern medicinal chemistry and covers all aspects of drug discovery from the initial lead to final development. It teaches how to convert a lead compound into a potential drug and provides recent case histories as examples of successes.

Medicinal Chemistry: Principles and Practice is unique in dealing with the subject in such a practical way and is the only book currently available to bring together all areas of the subject in one volume. This breadth of coverage is supplemented by references to specialist monographs and reviews, where the reader can find more detail on specific topics of interest if required.

Softcover **Approx 340 pages** **ISBN 0 85186 494 5** **1994** **Price £39.50**

Ref No 238

Amino Acids, Peptides and Proteins - Volume 25

Senior Reporter J.S. Davies, *University College of Swansea*

Formerly entitled *Amino Acids and Peptides*, this new volume provides a review of the literature published during 1992.

Contents: Amino Acids; Peptide Synthesis; Analogue and Conformational Studies on Peptide Hormones and Other Biologically Active Peptides; Cyclic, Modified, and Conjugated Peptides; Current Trends in Protein Research; Metal Complexes of Amino Acids and Peptides.

Specialist Periodical Report **Hardcover** **xiv + 410 pages** **ISBN 0 85186 234 9** **1994** **Price £110.00**

Ref No 185

Biotransformations: A Survey of the Biotransformations of Drugs and Chemicals in Animals - Volume 6

Edited by David R. Hawkins, *Huntingdon Research Centre Ltd*

Now in its sixth outstanding volume, **Biotransformations** has become established as a unique and important source for those involved in the discovery and development of new compounds. It now broadly covers the scientific literature for the period 1987 to 1992. The series provides a ready way of accessing information on the known pathways for the biotransformation of structurally-related compounds. Key functional groups provide an index-related procedure for retrieving information on compounds of interest. A further index allows the retrieval of examples of specific biochemical reactions which may have wider application.

Hardcover **xxxii + 412 pages** **ISBN 0 85186 127 X** **1994** **Price £130.00**

Looking for a single source of research results in all areas of chemistry?

One that's:

- * easy to read
- * international
- * complete with follow up text
- * published rapidly
- * comprehensive
- * affordable

Look no further than JOURNAL OF CHEMICAL RESEARCH!

Unique in format, it consists of two parts:

Part S contains brief, browsable SYNOPSES and SHORT PAPERS.
Part M provides the full texts in MINIPRINT or MICROFICHE format.

1995 Price	Synopses and Miniprint/Microfiche (12 issues)		
EEA	£360.00	USA	\$661.50
Canada (+GST)	£378.00	Rest of World	£378.00

HISTORY OF CHEMISTRY WALLCHARTS

These attractive, informative, full-colour posters are produced by The Royal Society of Chemistry in association with the Open University History of Chemistry Research Group.

Each makes an eye-catching, stimulating addition to any academic or professional environment, and will promote interest in the subject amongst students of all ages. Each is designed to be easy to follow and logical in its arrangement, with colour codes to link related areas. The following titles are available, putting present day chemistry in its historical context:

The Origins of Organic Chemistry 1800 - 1900

By C.A. Russell, The Open University

Illustrates the development of understanding of organic composition, and highlights the links between analysis, synthesis and structure.

ISBN 0 85186 440 6

Chemical Atomic and Molecular Theory 1800 - 1900

By N. Coley, The Open University

From the atomic theory of Dalton in 1807 to the discovery of the electron in the 1890s, the most significant moments in the development of the theories are clearly presented.

ISBN 0 85186 450 3

Industrial Chemistry 1800 - 1900

By W.A. Campbell, University of Newcastle upon Tyne

Vividly illustrates the origins of, and key developments in, the wide range of chemistry-based industries, and the scientists behind them.

ISBN 0 85186 470 8

Analytical Chemistry 1800 - 1900

By P.J.T. Morris

Portrays the many facets of the accumulation of knowledge and expertise in analytical chemistry, and the main guiding influences on these important breakthroughs and advances.

ISBN 0 85186 460 0

NEW

Issues in Environmental Science and Technology

Editors: **R E Hester**, *University of York, UK*
R M Harrison, *University of Birmingham, UK*

A new series covering important environmental issues . . .

. . . responding to the acute need for concise, authoritative and up to date reviews of topics of global concern. **Issues in Environmental Science and Technology** presents a multidisciplinary approach to pollution and environmental science. Articles are written by world experts in specialist fields. In addition to covering the chemistry of environmental processes, they focus on economic, legal and political aspects. The series reviews the effects of man-made substances on human and non-human biota, and assesses practical solutions to perceived environmental problems, including current efforts to establish 'clean technologies'.

It provides exactly the kind of coverage required by scientists and engineers in industry, government, public service, consultancy and academia. It is also designed for students taking courses in environmental chemistry, and provides excellent supplementary reference material for general science courses.

Each issue has a different theme and contains approximately six articles, usually commissioned. The first four issues cover:

1. MINING AND ITS ENVIRONMENTAL IMPACT

ISBN 0 85404 200 8 1994 Price £15.00

2. WASTE INCINERATION AND THE ENVIRONMENT

ISBN 0 85404 205 9 1994 Price £15.00

3. WASTE TREATMENT AND DISPOSAL

ISBN 0 85404 210 5 April 1995 Price £15.00

4. VOLATILE ORGANIC COMPOUNDS IN THE ATMOSPHERE

ISBN 0 85404 215 6 October 1995 Price £15.00

Also Available on subscription

JOURNAL OF MATERIALS CHEMISTRY

Journal of Materials Chemistry is interdisciplinary and international. It covers the synthesis, structures, properties and applications of materials, particularly those associated with advanced technology. It provides a vital platform from which researchers announce important new work. It spans inorganic, organic and physical chemistry.

It contains original primary papers, short, urgent communications, review articles, and conference news. It is peer reviewed to the highest standard and publishes papers within three to four months of acceptance and communications within 12 weeks of receipt.

- ★ It is more than 50% per million words less expensive than some of its commercial counterparts.
- ★ Its European price per million words has DECREASED by over 30% from 1994 to 1995.
- ★ There are almost 70% MORE editorial pages now than in 1991 - pages containing information **VITAL** to materials scientists
- ★ It has an impact factor that ranks with the world's top materials journals.
