February 1994

Solvent Structure and Perturbations in Solutions of Chemical and Biological Importance

By *J.L. Finney and A.K. Soper*

1

Helical Poly(isocyanides)

By *Roeland J.M. Nolte*

11

Thin Film Diamond by Chemical Vapour Deposition Methods

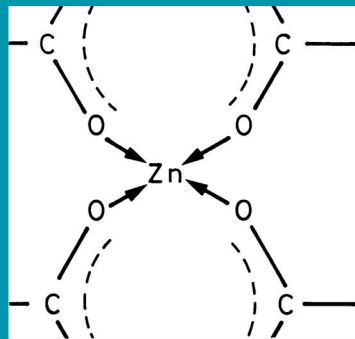

By *M.N.R. Ashfold, P.W. May, C.A. Rego, and N.M. Everitt*

21

Kirkwood–Buff Solution Theory: Derivation and Applications

By *Kenneth E. Newman*

31

Tetrathiafulvalenes as Building-blocks in Supramolecular Chemistry

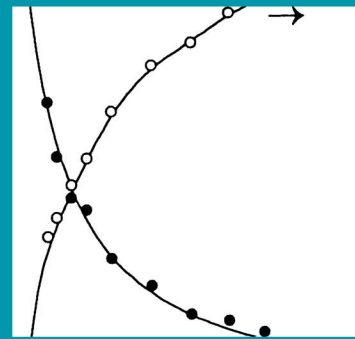

By *Tine Jørgensen, Thomas Kruse Hansen, and Jan Becher*

41

Polyelectrolyte Materials – Reflections on a Highly Charged Topic

By *John W. Nicholson*

53

Magnetic Field Gradients in NMR: Friend or Foe?

By *Timothy J. Norwood*

59

Thermodynamic Properties of Additive–Surfactant–Water Ternary Systems

By *R. De Lisi and S. Milioto*

67

Chemical Society Reviews

Editorial Board

Professor H. W. Kroto FRS (Chairman)	University of Sussex
Professor M. J. Blandamer	University of Leicester
Dr. A. R. Butler	University of St. Andrews
Professor E. C. Constable	University of Basel, Switzerland
Dr. T. C. Gallagher	University of Bristol
Professor D. M. P. Mingos FRS	Imperial College London
Professor J. F. Stoddart FRS	University of Birmingham

Consulting Editors

Dr. G. G. Balint-Kurti	University of Bristol
Professor S. A. Benner	Swiss Federal Institute of Technology, Zürich, Switzerland
Dr. J. M. Brown	University of Oxford
Dr. J. Burgess	University of Leicester
Dr. N. Cape	Institute of Terrestrial Ecology, Lothian
Professor B. T. Golding	University of Newcastle upon Tyne
Professor M. Green	University of Bath
Professor A. Hamnett	University of Newcastle upon Tyne
Dr. T. M. Herrington	University of Reading
Professor R. Hillman	University of Leicester
Professor R. Keese	University of Bern, Switzerland
Dr. T. H. Lilley	University of Sheffield
Dr. H. Maskill	University of Newcastle upon Tyne
Professor A. de Meijere	University of Göttingen, Germany
Professor J. N. Miller	Loughborough University of Technology
Professor S. M. Roberts	University of Exeter
Professor B. H. Robinson	University of East Anglia
Professor M. R. Smyth	Dublin City University, Republic of Ireland
Dr. A. J. Stace	University of Sussex

Staff Editor

Mr. K. J. Wilkinson	Royal Society of Chemistry, Cambridge
---------------------	---------------------------------------

It is intended that **Chemical Society Reviews** will have the broad appeal necessary for researchers to benefit from an awareness of advances in areas outside their own specialities. Deliberate efforts will be made to solicit authors and articles from Europe which present a truly international outlook on the major advances in a wide range of chemical areas. It is hoped that it will be particularly stimulating and instructive for students planning a career in research. The articles will be succinct and authoritative overviews of timely topics in modern chemistry.

In line with the above, review articles will not be overly comprehensive, detailed, or heavily referenced (*ca.* 30 references), but should act as a springboard to further reading. In general, authors, who will be recognized experts in their fields, will be asked to place any of their own work in the wider context. Review articles must be *short*, around 8–10 journal pages in extent. In consequence, manuscripts should not exceed 20–30 A4/American quarto sheets, this length to include text (in double line spacing), tables, references, and artwork. An Information to Authors leaflet is available from the Senior Editor (Reviews).

Although the majority of articles are intended to be specially commissioned, the Society always considers offers of articles for publication. In such cases a short synopsis (including a selection of the literature references that will be cited in the review and a brief academic CV of the author), rather than the completed article, should be submitted to the Senior Editor (Reviews), Books and Reviews Department, The Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF.
