

**Essential
Reading for
Atomic Spectrometrists**

Journal of Analytical Atomic Spectrometry (JAAS)

is the foremost journal in its field,
essential reading for everyone
interested in atomic spectrometry. It
offers a unique combination of news,
communications, primary research and reviews,
and is bigger and better value than ever.

Journal of Analytical Atomic Spectrometry

Some important facts about JAAS

- High impact factor – at 2.797 outstripping its main competitors
- Covers all aspects of the development of atomic spectrometric techniques
- International Editorial Board ensure submissions from around the world
- Guest Editor issues address important topics
- **Atomic Spectrometry Updates** give the reader a unique insight into key areas
- Surplus generated from sales is used to fund the promotion of chemistry

Now available electronically!

From January 1997, **JAAS** will be available electronically over the Internet. Now you can take this journal in either printed or electronic form, or both! This means that the valuable research information in this journal can be accessed faster and more easily than ever before. Please contact us at the address below for more details.

New low price for personal subscribers!

Now, if your library or employer already takes a full-rate subscription to this journal, you can take out a personal subscription at a fraction of the full price. This means you can avoid the walk to the library, or the long wait for a circulated copy. Contact us at the address below now to find out more.

1997 Subscription Prices

(12 issues plus author and subject index)

	USA	UK & Rest of World
Printed (ISSN 0267-9477)	\$1183.00	£657.00
Supplementary charge for online access for subscribers to the printed version	\$118.00	£66.00
Personal Rate (printed only)	\$135.00	£75.00
Online (ISSN 1364-5544)	\$1183.00	£657.00

Dalton Transactions - the logical choice

Dalton Transactions is one of the world's most respected inorganic chemistry journals, and continues to embrace all aspects of inorganic chemistry.

NOW AVAILABLE ELECTRONICALLY!

From January 1997, **Dalton Transactions** will be available electronically over the Internet. Now you can take this journal in either printed or electronic form, or both! This means that valuable research information can be accessed faster and more easily than ever before. Please contact us at the address below for more details.

Don't Forget ...

If your organisation already subscribes to **Dalton Transactions**, you can now take out an individual subscription to have your own personal copy of the journal delivered to the same site at a saving of around **90%**!

JOURNAL OF

Materials CHEMISTRY

THE ROYAL
SOCIETY OF
CHEMISTRY
Information
Services

Since its launch in 1991, **Journal of Materials Chemistry** has helped put materials chemistry firmly on the map of scientific literature, and has established itself as a leading primary journal, dealing with synthesis, structures, properties and applications of materials, particularly those associated with advanced technology.

JOURNAL OF MATERIALS CHEMISTRY

... goes electronic in 1997

From January 1997 **Journal of Materials Chemistry** will be available online, through a system which is fully searchable and browseable, and page-based to retain the integrity and clarity of the printed version.

If you currently subscribe to **Journal of Materials Chemistry**, you are entitled to the online version for a supplement of **just 10%**!

Other key features of **Journal of Materials Chemistry**:

- Feature articles
- Original primary papers
- Short urgent communications
- Rapid publication times (3-4 months from acceptance for papers, 8-12 weeks from receipt for communications)
- Accelerated publication for highly graded papers
- Free colour reproduction where appropriate
- No publication charges
- Thorough and judicious peer-reviewed system
- International in scope
- Personal Rate for individual subscribers
- Reduced subscription rate for RSC members
- Available as part of the RSC Special Journals Package
- Society owned not-for-profit journal

Environmental Chemistry

Pollution

Causes, Effects and Control

3rd Edition

Edited by RM Harrison, University of Birmingham, UK

The third edition of **Pollution** has once again been updated and expanded to reflect the changes that have taken place in recent years. In particular, it contains new chapters on marine pollution, soils and contaminated land and the effects of air pollutant exposure on human health.

The book's treatment of its subject is essentially introductory, although some aspects are covered in greater depth. The contributions combine to give a broad overview, touching on most of the important areas and delving deeper into many of them. More than ever, before, the environment is high on the political agenda, illustrating the need for authoritative scientific information on the subject. **Pollution** is a must for graduated and undergraduates with an interest in environmental and pollution research.

"This book is useful as a textbook and is highly recommended."
Environmental International (reviewing 2nd edition)

Softcover xxi + 480 pages
ISBN 0 85404 534 1 1996 £35.00

Environmental Impact of Chemicals Assessment and Control

Edited by M Quint, Dames & Moore, UK
D Taylor, Zeneca Environmental Lab, UK
R Purchase, Environmental Chemistry Group, RSC, UK

Environmental Impact of Chemicals contains a collection of views and theoretical discussions from industrialists, scientists and regulators which outline the latest legislative position and current state of the art on the rapidly changing field of environmental risk assessment.

Risk assessment in safety and, to an increasing extent, chemical product registration, has been practised for many years. It is only relatively recently, however, that it has been routinely applied to chemicals released into the environment. This book describes the underlying science of such assessment, the problems associated with it and the difficulties involved in communicating the results to the general public.

The book is highly practical and written from an applied perspective, with the majority of contributors being practitioners in the field. It will prove useful to researchers and professionals in industry as well as to consultancy and governmental bodies.

Special Publication No 176

Hardcover viii + 242 pages
ISBN 0 85404 795 6 1996 £69.50

Simple Guide on Management and Control of Wastes

This guide derives from a study carried out by a specialist committee of The Royal Society of Chemistry for the European Commission. As its title suggests, this is a basic guidebook which identifies with major moral, legal and administrative duties associated with the minimisation, control, and ultimate disposal of liquid, semi-solid and solid waste. **Simple Guide on Management and Control of Wastes** provides a useful reference work for those who need to acquaint themselves with the principles of waste management, identifying each of the major processes, such as incineration, landfill, recycling and ecologically acceptable waste reduction by physical, chemical and biological treatment. Throughout, the text is supported by data in diagrammatical form, together with tables of the EU waste identification criteria.

Softcover 75 pages
