

NPR

NATURAL PRODUCT REPORTS

For current developments in **BIOORGANIC CHEMISTRY**

“... the best review in the field”

THE SERIES LIBRARIAN

See what NPR can offer!

- Exclusive coverage of world-wide developments
- Critical reviews, highlighting recent advances
- ‘Hot off the Press’ topical current awareness feature
- High impact factor - NPR articles are read and quoted by an increasing number of bioorganic chemistry researchers
- Attractive, easy to read design

New for 1998 - NPR goes Electronic!

From January 1998, **NPR** is available online, through a system which is fully searchable and browsable, and page-based to retain the integrity and clarity of the printed version. If you have a full subscription to **NPR**, you can access the online version **FREE** of charge! Contact the Sales and Promotion Department at the address below for further details.

Are you searching for information?

**PAST,
PRESENT
and FUTURE ...**

- the Royal Society of Chemistry can provide the complete picture.

If you need a one-off search covering the last 20 years or more, **The Library and Information Centre (LIC)** in London has the largest information resource in the UK specifically devoted to chemistry and related areas and provides access to a wide selection of techno-commercial online databases. Other services include the Chemical Industry Enquiry Service and fast document delivery from one of the finest chemistry journal collections in Europe.

In contrast, **RSC Search Services** in Cambridge provides sophisticated **current awareness** literature searching on a range of scientific and business databases. This unique, customised current awareness service is tailored to the individual requirements of the customer.

So if you need information on any area of chemistry and related subjects, look no further than the LIC and Search Services:

- **confidential**
 - **cost-effective**
 - **complementary**
- services from the RSC**

Leading
International Journal
of Organic &
Bio-Organic Chemistry

PERKIN TRANSACTIONS 1

PERKIN 1 TO MERGE WITH CONTEMPORARY ORGANIC SYNTHESIS

From 1998, the material previously published as *Contemporary Organic Synthesis* journal will appear as a reviews section in **Perkin Transactions 1**. The journal will thus become essential reading for communications, full papers **and** reviews detailing the latest international advances in organic synthesis and bio-organic chemistry.

Other key features for 1998:

- NEW** ● **FREE** access to **Perkin 1 Online** to subscribers who take the printed journal at the full institutional rate
- NEW** ● **Perkin Abstracts** - a guide to recent developments in organic chemistry
 - Worldwide authorship and readership
 - Rapid publication
 - Special low personal rates if your institution already subscribes to the journal at the full rate
 - Full conference diary

THE SMART WAY TO STAY AHEAD!

Annual Reports on the Progress of Chemistry

NEW

Annual Reports goes Electronic!

Annual Reports will be available electronically via a page-based system which retains the clarity and integrity of the printed version. The electronic journal is fully searchable and browseable, and articles can be viewed, saved and printed. If you currently subscribe to **Annual Reports** at the full institutional rate, you can access the electronic version FREE of charge! For full details, please contact the Sales and Promotion Department at the address below.

Do you need your own personal copy?

Does your organization subscribe to any section of **Annual Reports** at the full institutional rate? If so, you are eligible for your own personal subscription to that same section at a vastly discounted rate - see below for details.

VOLUME 94 PRICING

	Institutional Rate includes FREE electronic access	Personal Rate*
Section A (Inorganic)	£131 / \$235	£47 / \$79
Section B (Organic)	£124 / \$225	£44 / \$75
Section C (Physical)	£131 / \$235	£47 / \$79
Special Package Price	£346 / \$625	

* Offer available only to individuals working for organisations who already have a full subscription at the same site.

ANNUAL REPORTS:

- Reviews exciting advances in all areas of contemporary chemistry
- Surveys all the major international journals
- Provides the reader with a critical overview
- Offers the essential background reading to research and teaching
- Appears in 3 sections, so you can select the area of most interest to you

- Section A: Inorganic Chemistry
- Section B: Organic Chemistry
- Section C: Physical Chemistry

**NEW
for
1998!**

NJC **New Journal of Chemistry**

NJC is a French, European and international not-for-profit general chemistry journal published by the Centre National de Recherche Scientifique (CNRS) and The Royal Society of Chemistry (RSC). *NJC* encompasses all branches of chemistry and its sub-disciplines; it is a monthly primary journal containing full research articles and letters.

ELECTRONIC ACCESS

From 1998 page-based electronic versions of all papers will be available online 24 hours a day in fully searchable format via CatchWord on the Internet and OCLC on the WWW at *no extra cost* to subscribers of the printed journal, for convenient site-wide access.

1998 PRICING

PRINTED JOURNAL

ISSN 1144 0546

Full Institutional Rate: £420 / \$685

Personal Rate*: £70 / \$120

ONLINE JOURNAL

ISSN 1369 9261

FREE to those with an institutional subscription

Others: £420 / \$685

* Please note - this price is available only to individuals working for organisations who have a full subscription at the same price

SPECIAL DISCOUNTS

We are pleased to offer special discounts for *NJC* subscriptions to French educational and research (not-for-profit) institutions, and to members of any European Chemical Society. French Franc options available. Please contact the RSC for further details.

NEW ESSENTIAL GENERAL CHEMISTRY PACKAGE

NJC fully complements two well established RSC journals, *Chemical Communications* and *Chemical Society Reviews*. Consequently, the three will be available as a money-saving *Essential General Chemistry Package* from January 1998.

Package Price: £1100 / \$1920 (including site-wide electronic access)

The RSC ploughs all of the surplus generated by its publishing back into chemistry worldwide. For further details see our website <http://chemistry.rsc.org/rsc/>

Celebrating its first anniversary in 1998!

Organic Process Research & Development

KEY FEATURES

- Substantive articles and reports from leading researchers
- Reports on original work in process chemistry
- Reports on scale up of processes to pilot plant, with discussions of safety and environmental issues
- Special focus on the design of chemical processes, and their development and scale up from laboratory to manufacture
- Current R&D in the fine organic and speciality chemical industries

1998 Pricing

6 issues a year ISSN 1083-6160
UK & Europe £289.00

Customers outside of Europe should obtain dollar prices and order from the ACS

"At last, a journal covering an area which we in industrial Process R&D are very much involved in ... the issues presented so far have met all my expectations with regard to topics, quality of papers and size. The editors are to be congratulated for succeeding in such a formidable way by simply saying: *what a wonderful start!*"

H-J Federsel, Associate Professor, Senior Manager, Process Chemistry Development, Astra Production Chemicals, Sweden.

"OPR&D is the long missing platform for industrial and academic chemists to exchange specific results in the field ... I would like to wish the editors and the journal further success, and an ever growing community of readers."

Professor B Kutscher, Director Chemical Research, ASTA Medica, Germany

"A dedicated high quality journal covering all aspects of the discipline. Congratulations to the whole team at the first anniversary of OPR&D. Industry has subscribed massively, but also universities and schools should not miss this opportunity. OPR&D is valuable and real life feedback from industry, and can help bridge the gap. I wish you lots of success for many years to come."

F De Knaep, Director Process Research Janssen Pharmaceutica, Belgium
