

Make an impact

***ChemComm*, a leading weekly international journal for the publication of communications on important new developments, supplies a vibrant blend of high quality research from across the chemical sciences.**

With rapid publication times, a rigorous peer review process and an impact factor of **4.426***, *ChemComm* has high visibility (indexed in MEDLINE) and is the perfect choice for work that commands universal respect.

Offering the flexibility of a 3 page communication limit and additional unique features such as html enhancement with our new *Project Prospect* (www.projectprospect.org), *ChemComm* celebrates more than 40 years of publishing excellence with a service that's out of this world.

Submit your work to *ChemComm* now and get light years ahead of the competition!

Turning Points in Solid-State, Materials and Surface Science

A Book in Celebration of the Life and Work of Sir John Meurig Thomas

Edited by: Kenneth D M Harris and Peter P Edwards

Foreword by: Roald Hoffmann

Introduction by: Ahmed H Zewail

Publication date: November 2007

Publisher: RSC Publishing

Book Type: Professional Reference

ISBN: 9780854041145

Price: £99.95

Turning Points in Solid-State, Materials and Surface Science

provides a state-of-the-art survey of some of the most important recent developments across the spectrum of solid-state, materials and surface sciences, while at the same time reflecting on key turning points in the evolution of this scientific discipline and projecting into the directions for future research progress.

The book serves as a timely tribute to the life and work of Professor Sir John Meurig Thomas FRS, who has made monumental contributions to this field of science throughout his distinguished 50-year career in research, during which he has initiated, developed and exploited many important branches of this field. Indeed, the depth and breadth of his contributions towards the evolution and advancement of this scientific discipline, and his critical role in elevating this field to the important position that it now occupies within modern science, are demonstrated recurrently throughout the chapters of this book.
