# Soft Matter

New for 2005 - a high quality interdisciplinary journal publishing research into soft materials, including complex fluids.

The international editorial board members include:

**Ullrich Steiner** (Editorial Board Chair)

*University of Cambridge, UK*

**Darrin Pochan** (Associate Editor for North America)

*University of Delaware, USA*

**Colin Bain**

*University of Oxford, UK*

**Paula Hammond**

*Massachusetts Institute of Technology, USA*

**Geoff Maitland**

*Schlumberger, UK*

**Tom McLeish**

*University of Leeds, UK*

**Helmuth Möhwald**

*Max-Planck-Institut, Golm, Germany*

**Samuel I. Stupp**

*Northwestern University, USA*

**Kaoru Tsujii**

*Hokkaido University, Japan*

# RSC Biomolecular Sciences

## New series from the RSC

### Editor-in-Chief:

Professor Stephen Neidle, *University of London, UK*

### Series Editors:

Dr Simon F Campbell

Dr Marius Clore, *National Institutes of Health, USA*

Professor David M J Lilley, *University of Dundee, UK*

The **RSC Biomolecular Sciences** series will:

- provide an authoritative insight to research at the interface between chemistry and biology
- consist of range of a research monographs, edited by high profile, international scientists working in the field
- be fully referenced to the primary literature
- consist of full colour, individual topic books

### Readership

Academic researchers, graduate students, government institutions, industry

### Market

Structural biology, drug discovery and biophysical chemistry

### Format

Hardcover

### First title in the series

#### **Biophysical and Structural Aspects of Bioenergetics**

Edited by M Wikström

**Biophysical and Structural Aspects of Bioenergetics** brings together contributions from internationally respected experts. It provides a representative snapshot of the very latest key developments in this multidisciplinary subject, with an emphasis on molecular structure, and how this changes during the bioenergetic function. Offering a comprehensive overview of the current state of the art, and complete with extensive citations in each chapter, this book is the ideal reference for both biochemists and biophysicists studying this fascinating topic.
