

Subject Index of Volume 68

- Airlift tube reactor**
overall volumetric oxygen transfer coefficient and optimal geometry of airlift tube reactor, 29
- Calcium sulphate hemihydrate**
crystallization of calcium sulphate hemihydrate in concentrated phosphoric acid solutions, 123
- Capacitance tomography**
simulation of the performance of electrical capacitance tomography for measurement of dense phase pneumatic conveying, 197
- Cellobiase**
production and immobilization of cellobiase from *Aspergillus niger* A20, 189
- Circulating fluidized bed**
a core–annulus model for the radial flow structure in a liquid–solid circulating fluidized bed (LSCFB), 51
circulation of solids and gas bypassing in an internally circulating fluidized bed with a draft tube, 115
- CO₂ methanation**
difference in the selectivity of CO and CO₂ methanation reactions, 63
- CO methanation**
difference in the selectivity of CO and CO₂ methanation reactions, 63
- Convective–diffusion**
on the numerical solution of an electrolytic convective–diffusion problem in an externally imposed force field, 69
- Convective–diffusive transport and reaction**
an integral–spectral approach for convective–diffusive mass transfer with chemical reaction in Couette flow Mathematical formulation and numerical illustrations, 11
- Core–annulus model**
a core–annulus model for the radial flow structure in a liquid–solid circulating fluidized bed (LSCFB), 51
- Couette flows with reaction**
an integral–spectral approach for convective–diffusive mass transfer with chemical reaction in Couette flow Mathematical formulation and numerical illustrations, 11
- Counter–current**
experimental observation of pressure drop overshoot following an onset of gas flow in counter–current beds, 207
- Crystallization**
particle design Part A: Nucleation kinetics of ketoprofen, 95
particle design Part B: batch quasi–emulsion process and mechanism of grain formation of ketoprofen, 103
crystallization of calcium sulphate hemihydrate in concentrated phosphoric acid solutions, 123
- CSTR**
dynamic neural network control for non–linear systems: optimal neural network structure and stability analysis, 41
- Deep–bed filtration**
changes in fluid residence time distribution during deep–bed filtration, 131
- Distillation**
separation of ethyl tert–butyl ether–ethanol by combined pervaporation and distillation, 139
- Draft tube**
circulation of solids and gas bypassing in an internally circulating fluidized bed with a draft tube, 115
- Droplet**
particle design Part A: Nucleation kinetics of ketoprofen, 95
- Dynamic neural network control**
dynamic neural network control for non–linear systems: optimal neural network structure and stability analysis, 41
- Eigenvalues and Eigenvectors with airy functions**
an integral–spectral approach for convective–diffusive mass transfer with chemical reaction in Couette flow Mathematical formulation and numerical illustrations, 11
- Electrolysis**
on the numerical solution of an electrolytic convective–diffusion problem in an externally imposed force field, 69
- Emulsion**
particle design Part B: batch quasi–emulsion process and mechanism of grain formation of ketoprofen, 103
flow of two–phase oil/water mixtures through sudden expansions and contractions, 157
- ETBE**
separation of ethyl tert–butyl ether–ethanol by combined pervaporation and distillation, 139
- Ethanol**
separation of ethyl tert–butyl ether–ethanol by combined pervaporation and distillation, 139
- Flow**
flow of two–phase oil/water mixtures through sudden expansions and contractions, 157
- Flow structure**
a core–annulus model for the radial flow structure in a liquid–solid circulating fluidized bed (LSCFB), 51
- Fluidization behaviour**
development of a new type of thermogravimetric analyser with a mini–tapered fluidized bed. Effect of fluidization of particles on the stability of the system, 7
- Fluid residence time distribution**
changes in fluid residence time distribution during deep–bed filtration, 131
- Fourier series**
an integral–spectral approach for convective–diffusive mass transfer with chemical reaction in Couette flow Mathematical formulation and numerical illustrations, 11
- Gas bypassing**
circulation of solids and gas bypassing in an internally circulating fluidized bed with a draft tube, 115

- Gas–solid reactions
 a quantized solution for the nucleation model in gas–solid reactions, 1
- Granular polymers
 modelling and simulation of extraction of oligomer from granular polymers, 165
- Image distortion
 simulation of the performance of electrical capacitance tomography for measurement of dense phase pneumatic conveying, 197
- Immobilization
 production and immobilization of cellobiase from *Aspergillus niger* A20, 189
- Integral–spectral methods
 an integral–spectral approach for convective–diffusive mass transfer with chemical reaction in Couette flow Mathematical formulation and numerical illustrations, 11
- Iron oxides
 mechanism and kinetic control of the oxyprecipitation of sulphuric liquors from steel pickling, 173
- Kinetics
 kinetic study of the direct causticization reaction involving titanates and titanium dioxide, 87
 mechanism and kinetic control of the oxyprecipitation of sulphuric liquors from steel pickling, 173
- Liquid hold-up
 experimental observation of pressure drop overshoot following an onset of gas flow in counter-current beds, 207
- Liquid–solid system
 a core–annulus model for the radial flow structure in a liquid–solid circulating fluidized bed (LSCFB), 51
- Local mass transfer
 the effects of a variety of wall obstructions on local mass transfer in a parallel plate electrochemical flow cell, 145
- Local velocities
 local measurements of fluid and particle velocities in a stirred suspension, 75
- Magnetic field
 on the numerical solution of an electrolytic convective–diffusion problem in an externally imposed force field, 69
- Mass and thermal transfers
 particle design Part B: batch quasi-emulsion process and mechanism of grain formation of ketoprofen, 103
- Mass transfer
 particle design Part A: Nucleation kinetics of ketoprofen, 95
- Mechanism
 mechanism and kinetic control of the oxyprecipitation of sulphuric liquors from steel pickling, 173
- Model-based control
 dynamic neural network control for non-linear systems: optimal neural network structure and stability analysis, 41
- Modelling
 modelling and simulation of extraction of oligomer from granular polymers, 165
- Neural networks
 dynamic neural network control for non-linear systems: optimal neural network structure and stability analysis, 41
- Non-linear systems
 dynamic neural network control for non-linear systems: optimal neural network structure and stability analysis, 41
- Nucleation kinetics
 particle design Part A: Nucleation kinetics of ketoprofen, 95
- Nucleation model
 a quantized solution for the nucleation model in gas–solid reactions, 1
- Oil/water mixture
 flow of two-phase oil/water mixtures through sudden expansions and contractions, 157
- Oligomer extraction
 modelling and simulation of extraction of oligomer from granular polymers, 165
- Optimal control
 a pattern recognition approach to the solution of optimal singular control problems, 35
- Optimal geometry
 overall volumetric oxygen transfer coefficient and optimal geometry of airlift tube reactor, 29
- Oxidation
 mechanism and kinetic control of the oxyprecipitation of sulphuric liquors from steel pickling, 173
- Oxygen mass transfer
 overall volumetric oxygen transfer coefficient and optimal geometry of airlift tube reactor, 29
- Parallel plate electrochemical flow cell
 the effects of a variety of wall obstructions on local mass transfer in a parallel plate electrochemical flow cell, 145
- Particle suspension
 local measurements of fluid and particle velocities in a stirred suspension, 75
- Pervaporation
 separation of ethyl tert-butyl ether–ethanol by combined pervaporation and distillation, 139
- Phase Doppler technique
 local measurements of fluid and particle velocities in a stirred suspension, 75
- Powder slugs
 simulation of the performance of electrical capacitance tomography for measurement of dense phase pneumatic conveying, 197
- Precipitation
 mechanism and kinetic control of the oxyprecipitation of sulphuric liquors from steel pickling, 173
- Pressure drop
 experimental observation of pressure drop overshoot following an onset of gas flow in counter-current beds, 207
- Pressure overshoot
 experimental observation of pressure drop overshoot following an onset of gas flow in counter-current beds, 207
- Process
 particle design Part B: batch quasi-emulsion process and mechanism of grain formation of ketoprofen, 103
- Production
 production and immobilization of cellobiase from *Aspergillus niger* A20, 189
- Quantized solution technique
 a quantized solution for the nucleation model in gas–solid reactions, 1
- Radial non-uniformity
 a core–annulus model for the radial flow structure in a liquid–solid circulating fluidized bed (LSCFB), 51
- Secondary nucleation
 crystallization of calcium sulphate hemihydrate in concentrated phosphoric acid solutions, 123
- Selectivity of methanation
 difference in the selectivity of CO and CO₂ methanation reactions, 63

- Singular arcs
a pattern recognition approach to the solution of optimal singular control problems, 35
- Slug perturbation
simulation of the performance of electrical capacitance tomography for measurement of dense phase pneumatic conveying, 197
- Sodium carbonate
kinetic study of the direct causticization reaction involving titanates and titanium dioxide, 87
- Solids circulation rate
circulation of solids and gas bypassing in an internally circulating fluidized bed with a draft tube, 115
- Solid state reaction
kinetic study of the direct causticization reaction involving titanates and titanium dioxide, 87
- Spherical grains
particle design Part B: batch quasi-emulsion process and mechanism of grain formation of ketoprofen, 103
- Stability analysis
dynamic neural network control for non-linear systems: optimal neural network structure and stability analysis, 41
- Stirred tank reactors
local measurements of fluid and particle velocities in a stirred suspension, 75
- Surface conditions of the filter
changes in fluid residence time distribution during deep-bed filtration, 131
- Tapered fluidized bed
development of a new type of thermogravimetric analyser with a mini-tapered fluidized bed. Effect of fluidization of particles on the stability of the system, 7
- Thermal gravimetry
development of a new type of thermogravimetric analyser with a mini-tapered fluidized bed. Effect of fluidization of particles on the stability of the system, 7
- Time varying processes
dynamic neural network control for non-linear systems: optimal neural network structure and stability analysis, 41
- Titanates
kinetic study of the direct causticization reaction involving titanates and titanium dioxide, 87
- Titanium dioxide
kinetic study of the direct causticization reaction involving titanates and titanium dioxide, 87
- Transient flow
experimental observation of pressure drop overshoot following an onset of gas flow in counter-current beds, 207
- Two-phase
flow of two-phase oil/water mixtures through sudden expansions and contractions, 157
- Wall obstructions
the effects of a variety of wall obstructions on local mass transfer in a parallel plate electrochemical flow cell, 145
