

Subject Index of Volume 104

Adsorption

Flow injection potentiometric stripping analysis for study of adsorption of heavy metal ions onto modified diatomite, 83

Aerobic process

Application of steady-state and dynamic modeling for the prediction of the BOD of an aerated lagoon at a pulp and paper mill, Part I. Linear approaches, 73

Ammonium formate

Catalytic transfer hydrogenation: *o*-nitro anisole to *o*-anisidine, some process development aspects, 27

Auto-thermal reformer

Design of a fuel processor unit for PEM fuel cell via shortcut design method, 7

Axial mixing

Characterization of liquid phase mixing in turbulent bed contactor through RTD studies, 19

Biochemical oxygen demand

Application of steady-state and dynamic modeling for the prediction of the BOD of an aerated lagoon at a pulp and paper mill. Part I. Linear approaches, 73

Bioprocess monitoring

Application of steady-state and dynamic modeling for the prediction of the BOD of an aerated lagoon at a pulp and paper mill. Part I. Linear approaches, 73

Catalyst (Pd/C)

Catalytic transfer hydrogenation: *o*-nitro anisole to *o*-anisidine, some process development aspects, 27

Chemical oscillator

Study of unsteady state process operation, 63

Chemical reduction method

Optimization of experimental conditions based on the Taguchi robust design for the formation of nano-sized silver particles by chemical reduction method, 55

Diatomite

Flow injection potentiometric stripping analysis for study of adsorption of heavy metal ions onto modified diatomite, 83

Direct reduction.

Modeling of counter current moving bed gas-solid reactor used in direct reduction of iron ore, 35

Dispersed phase liquid holdup

Holdup and pressure drop studies in structured packings with catalysts, 45

Dispersion

Characterization of liquid phase mixing in turbulent bed contactor through RTD studies, 19

Flow injection

Flow injection potentiometric stripping analysis for study of adsorption of heavy metal ions onto modified diatomite, 83

Flow pattern studies

Holdup and pressure drop studies in structured packings with catalysts, 45

Fluidization

Characterization of liquid phase mixing in turbulent bed contactor through RTD studies, 19

Gas-solid reactor

Modeling of counter current moving bed gas-solid reactor used in direct reduction of iron ore, 35

Heavy metals

Flow injection potentiometric stripping analysis for study of adsorption of heavy metal ions onto modified diatomite, 83

Input fluctuation

Study of unsteady state process operation, 63

KATAPAK[®]-SP 12

Holdup and pressure drop studies in structured packings with catalysts, 45

Lignocellulosic solid

Kinetic study of the thermal degradation of alkaline straw black liquor in nitrogen atmosphere, 1

Linear multivariate regression techniques

Application of steady-state and dynamic modeling for the prediction of the BOD of an aerated lagoon at a pulp and paper mill, Part I. Linear approaches, 73

Moving bed

Modeling of counter current moving bed gas-solid reactor used in direct reduction of iron ore, 35

Multiphase flow

Characterization of liquid phase mixing in turbulent bed contactor through RTD studies, 19

Multiphase reactors

Characterization of liquid phase mixing in turbulent bed contactor through RTD studies, 19

o-Nitro anisole

Catalytic transfer hydrogenation: *o*-nitro anisole to *o*-anisidine, some process development aspects, 27

Optimization

Optimization of experimental conditions based on the Taguchi robust design for the formation of nano-sized silver particles by chemical reduction method, 55

PEMFC

Design of a fuel processor unit for PEM fuel cell via shortcut design method, 7

PLS modeling

Application of steady-state and dynamic modeling for the prediction of the BOD of an aerated lagoon at a pulp and paper mill, Part I. Linear approaches, 73

Potentiometric

Flow injection potentiometric stripping analysis for study of adsorption of heavy metal ions onto modified diatomite, 83

- Pressure drop
 Holdup and pressure drop studies in structured packings with catalysts, 45
- Pyrolysis
 Kinetic study of the thermal degradation of alkaline straw black liquor in nitrogen atmosphere, 1
- Reaction kinetics
 Design of a fuel processor unit for PEM fuel cell via shortcut design method, 7
- Reactive distillation
 Holdup and pressure drop studies in structured packings with catalysts, 45
- Shaft furnace simulation
 Modeling of counter current moving bed gas-solid reactor used in direct reduction of iron ore, 35
- Silver nano-particles
 Optimization of experimental conditions based on the Taguchi robust design for the formation of nano-sized silver particles by chemical reduction method, 55
- Stripping analysis
 Flow injection potentiometric stripping analysis for study of adsorption of heavy metal ions onto modified diatomite, 83
- Structured packing
 Holdup and pressure drop studies in structured packings with catalysts, 45
- Taguchi robust design
 Optimization of experimental conditions based on the Taguchi robust design for the formation of nano-sized silver particles by chemical reduction method, 55
- Thermogravimetric studies
 Kinetic study of the thermal degradation of alkaline straw black liquor in nitrogen atmosphere, 1
- Transfer hydrogenation
 Catalytic transfer hydrogenation: *o*-nitro anisole to *o*-anisidine, some process development aspects, 27
- Turbulent bed contactor
 Characterization of liquid phase mixing in turbulent bed contactor through RTD studies, 19
- Unsteady state operation
 Study of unsteady state process operation, 63
- Wastewater treatment
 Application of steady-state and dynamic modeling for the prediction of the BOD of an aerated lagoon at a pulp and paper mill, Part I. Linear approaches, 73
- Water gas shift reaction
 Design of a fuel processor unit for PEM fuel cell via shortcut design method, 7
