

Subject Index of Volume 114

- Absorption
Gas/liquid mass transfer in carbon dioxide–alkanes mixtures, 131
- Acid Red-151 oxidation
Enhancement of biodegradability by continuous ozonation in Acid Red-151 solutions and kinetic modeling, 99
- Activated carbon felt
Study of the performance of Pt catalysts supported on activated carbon felt and granular carbon for nitrobenzene hydrogenation, 33
- Activated carbon powder
Study of the performance of Pt catalysts supported on activated carbon felt and granular carbon for nitrobenzene hydrogenation, 33
- Adsorbents
Producing adsorbents from sewage sludge and discarded tyres. Characterization and utilization for the removal of pollutants from water, 161
- Adsorption
Sensitivity of Freundlich equation constant $1/n$ for zinc sorption on changes induced in calcite by mechanical activation, 115
- Agitated reactors
An algorithm for predicting the hydrodynamic and mass transfer parameters in agitated reactors, 9
- Alkanes
Gas/liquid mass transfer in carbon dioxide–alkanes mixtures, 131
- Alkylation
Alkylation of toluene with isopropyl alcohol catalyzed by Ce-exchanged NaX zeolite, 39
- Amberlite XAD
Removal of some chelators from aqueous solutions using polymeric ingredients, 105
- Annular-flow reactor
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 1. Fundamental experiment for reactor design, 153
- Azo dye oxidation
Enhancement of biodegradability by continuous ozonation in Acid Red-151 solutions and kinetic modeling, 99
- Biodegradability enhancement
Enhancement of biodegradability by continuous ozonation in Acid Red-151 solutions and kinetic modeling, 99
- Calcite
Sensitivity of Freundlich equation constant $1/n$ for zinc sorption on changes induced in calcite by mechanical activation, 115
- Carbon dioxide
Gas/liquid mass transfer in carbon dioxide–alkanes mixtures, 131
- Catalysis
Isomerization of 1,5- to 2,6-dimethylnaphthalene and its thermodynamic aspects, 73
- Ce-exchanged zeolite
Alkylation of toluene with isopropyl alcohol catalyzed by Ce-exchanged NaX zeolite, 39
- Cerium(IV)
Electrochemical cell design and development for mediated electrochemical oxidation-Ce(III)/Ce(IV)system, 55
- Characterization
Producing adsorbents from sewage sludge and discarded tyres. Characterization and utilization for the removal of pollutants from water, 161
- Coarse particles
Hydrodynamics of shallow fluidized bed of coarse particles, 47
- Continuous ozonation
Enhancement of biodegradability by continuous ozonation in Acid Red-151 solutions and kinetic modeling, 99
- Cymene
Alkylation of toluene with isopropyl alcohol catalyzed by Ce-exchanged NaX zeolite, 39
- Desulfurization
Removal of sulfur dioxide by fly ash/CaO/CaSO₄ sorbents, 171
- Diffusion model
Removal of some chelators from aqueous solutions using polymeric ingredients, 105
- Dimethylnaphthalenes
Isomerization of 1,5- to 2,6-dimethylnaphthalene and its thermodynamic aspects, 73
- Divided cell
Electrochemical cell design and development for mediated electrochemical oxidation-Ce(III)/Ce(IV)system, 55
- EDTA
Removal of some chelators from aqueous solutions using polymeric ingredients, 105
- Electrochemical cell
Electrochemical cell design and development for mediated electrochemical oxidation-Ce(III)/Ce(IV)system, 55
- Escherichia coli*
Kinetics of bacteria disinfection with UV radiation in an absorbing and nutritious medium, 87
- Ferric chloride
Dissolution kinetics of sphalerite in acidic ferric chloride leaching, 67
- Film-diffusional resistance
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 2. Reactor performance, 145
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 1. Fundamental experiment for reactor design, 153
- Fixed bed reactor
Removal of sulfur dioxide by fly ash/CaO/CaSO₄ sorbents, 171
- Flue gas
Removal of sulfur dioxide by fly ash/CaO/CaSO₄ sorbents, 171
- Fluidization
Liquid mixing and gas–liquid mass transfer in a three-phase inverse turbulent bed reactor, 1

- Fly ash
Removal of sulfur dioxide by fly ash/CaO/CaSO₄ sorbents, 171
- Formaldehyde
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 2. Reactor performance, 145
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 1. Fundamental experiment for reactor design, 153
- Free volume theory
Pervaporation properties of PDMS membranes for removal of benzene from aqueous solution: Experimental and modeling, 123
- Freundlich
Sensitivity of Freundlich equation constant $1/n$ for zinc sorption on changes induced in calcite by mechanical activation, 115
- Hydrodynamics
An algorithm for predicting the hydrodynamic and mass transfer parameters in agitated reactors, 9
- Iron–chromium oxides
Kinetics of the water–gas shift reaction over a rhodium-promoted iron–chromium oxide catalyst, 81
- Isomerization
Isomerization of 1,5- to 2,6-dimethylnaphthalene and its thermodynamic aspects, 73
- Kinetic model
Dissolution kinetics of sphalerite in acidic ferric chloride leaching, 67
- Kinetic modeling
Enhancement of biodegradability by continuous ozonation in Acid Red-151 solutions and kinetic modeling, 99
- Kinetic models
Kinetics of the water–gas shift reaction over a rhodium-promoted iron–chromium oxide catalyst, 81
- Kinetics
Alkylation of toluene with isopropyl alcohol catalyzed by Ce-exchanged NaX zeolite, 39
- Leaching
Dissolution kinetics of sphalerite in acidic ferric chloride leaching, 67
- Liquid-phase adsorption
Producing adsorbents from sewage sludge and discarded tyres. Characterization and utilization for the removal of pollutants from water, 161
- Mass transfer
An algorithm for predicting the hydrodynamic and mass transfer parameters in agitated reactors, 9
- Mechanical activation
Sensitivity of Freundlich equation constant $1/n$ for zinc sorption on changes induced in calcite by mechanical activation, 115
- Mixing
Liquid mixing and gas–liquid mass transfer in a three-phase inverse turbulent bed reactor, 1
- Modeling
Liquid mixing and gas–liquid mass transfer in a three-phase inverse turbulent bed reactor, 1
- Moving bed
Liquid mixing and gas–liquid mass transfer in a three-phase inverse turbulent bed reactor, 1
- Multiphase reactors
Liquid mixing and gas–liquid mass transfer in a three-phase inverse turbulent bed reactor, 1
- NaX zeolite
Alkylation of toluene with isopropyl alcohol catalyzed by Ce-exchanged NaX zeolite, 39
- Neural networks
Modeling of an RO water desalination unit using neural networks, 139
- Nitrobenzene hydrogenation
Study of the performance of Pt catalysts supported on activated carbon felt and granular carbon for nitrobenzene hydrogenation, 33
- Optimum (BOD₅/COD) ratio
Enhancement of biodegradability by continuous ozonation in Acid Red-151 solutions and kinetic modeling, 99
- Parallel array of light sources
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 2. Reactor performance, 145
- PDMS
Pervaporation properties of PDMS membranes for removal of benzene from aqueous solution: Experimental and modeling, 123
- Pervaporation
Pervaporation properties of PDMS membranes for removal of benzene from aqueous solution: Experimental and modeling, 123
- Photocatalytic decomposition
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 2. Reactor performance, 145
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 1. Fundamental experiment for reactor design, 153
- Photoreaction model
Kinetics of bacteria disinfection with UV radiation in an absorbing and nutritious medium, 87
- Pressure fluctuation
Hydrodynamics of shallow fluidized bed of coarse particles, 47
- Process modeling
Modeling of an RO water desalination unit using neural networks, 139
- Pt-supported catalysts
Study of the performance of Pt catalysts supported on activated carbon felt and granular carbon for nitrobenzene hydrogenation, 33
- Reaction-controlled process
Dissolution kinetics of sphalerite in acidic ferric chloride leaching, 67
- Redox mediator
Electrochemical cell design and development for mediated electrochemical oxidation-Ce(III)/Ce(IV) system, 55
- Regeneration
Electrochemical cell design and development for mediated electrochemical oxidation-Ce(III)/Ce(IV) system, 55
- Regimes of fluidization
Hydrodynamics of shallow fluidized bed of coarse particles, 47
- Removal
Removal of some chelators from aqueous solutions using polymeric ingredients, 105
- Reverse osmosis
Modeling of an RO water desalination unit using neural networks, 139
- Rhodium promotion
Kinetics of the water–gas shift reaction over a rhodium-promoted iron–chromium oxide catalyst, 81
- Scale-up
An algorithm for predicting the hydrodynamic and mass transfer parameters in agitated reactors, 9
- Sewage sludge
Producing adsorbents from sewage sludge and discarded tyres. Characterization and utilization for the removal of pollutants from water, 161
- Sick-building syndrome
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 2. Reactor performance, 145
Decomposition of gaseous formaldehyde in a photocatalytic reactor with a parallel array of light sources. 1. Fundamental experiment for reactor design, 153
- Solution-diffusion model
Pervaporation properties of PDMS membranes for removal of benzene from aqueous solution: Experimental and modeling, 123

- Sorbent
Removal of sulfur dioxide by fly ash/CaO/CaSO₄ sorbents, 171
- Sphalerite
Dissolution kinetics of sphalerite in acidic ferric chloride leaching, 67
- Sulfur dioxide
Removal of sulfur dioxide by fly ash/CaO/CaSO₄ sorbents, 171
- Thermodynamic
Isomerization of 1,5- to 2,6-dimethylnaphthalene and its thermodynamic aspects, 73
- Thermodynamics
Producing adsorbents from sewage sludge and discarded tyres. Characterization and utilization for the removal of pollutants from water, 161
- Toluene
Alkylation of toluene with isopropyl alcohol catalyzed by Ce-exchanged NaX zeolite, 39
- Transition velocities
Hydrodynamics of shallow fluidized bed of coarse particles, 47
- TTA
Removal of some chelators from aqueous solutions using polymeric ingredients, 105
- Tyres
Producing adsorbents from sewage sludge and discarded tyres. Characterization and utilization for the removal of pollutants from water, 161
- Ultraviolet radiation
Kinetics of bacteria disinfection with UV radiation in an absorbing and nutritious medium, 87
- Undivided cell
Electrochemical cell design and development for mediated electrochemical oxidation-Ce(III)/Ce(IV) system, 55
- UNIFAC-FV
Pervaporation properties of PDMS membranes for removal of benzene from aqueous solution: Experimental and modeling, 123
- Water desalination
Modeling of an RO water desalination unit using neural networks, 139
- Water disinfection
Kinetics of bacteria disinfection with UV radiation in an absorbing and nutritious medium, 87
- Water–gas shift reaction
Kinetics of the water–gas shift reaction over a rhodium-promoted iron–chromium oxide catalyst, 81
- Zinc
Sensitivity of Freundlich equation constant $1/n$ for zinc sorption on changes induced in calcite by mechanical activation, 115
