

Subject Index of Volume 116

- ac/dc power supply
A semi-wet technological process for flue gas desulfurization by corona discharges at an industrial scale, 139
- Activated carbon fibers
Catalytic oxidation of NO by activated carbon fiber (ACF), 25
- Activated carbons
Characterization and phenols sorptive properties of carbons activated by sulphuric acid, 47
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
Utilization of fluidized bed reactor for the production of adsorbents in removal of malachite green, 211
Removal of metals and organics in a chemical decontamination process solution: Laboratory and semi-pilot scale experiments, 219
- Activation
Catalytic oxidation of NO by activated carbon fiber (ACF), 25
- Adsorption
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
Photocatalytic decolorization of rhodamine B by immobilized TiO₂ onto silicone sealant, 133
Removal of metals and organics in a chemical decontamination process solution: Laboratory and semi-pilot scale experiments, 219
- Adsorption isotherm
Utilization of fluidized bed reactor for the production of adsorbents in removal of malachite green, 211
- Aerating
Individual impeller flooding in aerated vessel stirred by multiple-Rushton impellers, 85
- Air bubbling
Atrazine adsorption from aqueous solution using powdered activated carbon—Improved mass transfer by air bubbling agitation, 53
- Bacteria
A contribution to the UV dose concept for bacteria disinfection in well mixed photoreactors, 197
- BiodeNOx
Reactive NO absorption in aqueous Fe^{II}(EDTA) solutions in the presence of denitrifying micro-organisms, 67
- Biodiesel
Transesterification of crude palm kernel oil and crude coconut oil by different solid catalysts, 61
- Bubble columns
Mass transfer measurements in a non-isothermal bubble column using the uncatalyzed oxidation of sulphite to sulphate, 97
Mass transfer to the wall of a packed and unpacked bubble column operating with Newtonian and non-Newtonian liquids, 105
The effect of different feed flow patterns on the conversion of bubble column reactors, 163
- Butylene
Reaction behaviors and mechanisms of catalytic pyrolysis of C4 hydrocarbons, 155
- C4 hydrocarbons
Reaction behaviors and mechanisms of catalytic pyrolysis of C4 hydrocarbons, 155
- Carbonate
Analysis of mass transfer in the precipitation process of calcium carbonate using a gas/liquid reaction, 203
- Catalyst
Development of a microchannel reactor concerning steam reforming of methanol, 123
- Catalytic conversion
Particle size distribution effect on catalytic conversion in a CSTR, 233
- Catalytic oxidation
Catalytic incineration of ethylene oxide in the packed bed reactor, 173
- Catalytic pyrolysis
Reaction behaviors and mechanisms of catalytic pyrolysis of C4 hydrocarbons, 155
- Central composite design
Influence of process variables and optimization of ethylene yield in oxidative coupling of methane over Li/MgO catalyst, 187
- Chemical kinetics
Chemical kinetics of hydroxylation of phenol catalyzed by TS-1/diatomite in fixed-bed reactor, 179
- Coating
Development of a microchannel reactor concerning steam reforming of methanol, 123
- Coconut oil
Transesterification of crude palm kernel oil and crude coconut oil by different solid catalysts, 61
- Combustion
Hydrogen enrichment of a methane–air mixture by atmospheric pressure plasma for vehicle applications, 13
- Cong red dye
Adsorption studies on treatment of textile dyeing industrial effluent by fly-ash, 77
- Continuous synthesis
Continuous synthesis of zeolite NaA in a microchannel reactor, 115
- Decontamination process
Removal of metals and organics in a chemical decontamination process solution: Laboratory and semi-pilot scale experiments, 219
- Degradation
Removal of metals and organics in a chemical decontamination process solution: Laboratory and semi-pilot scale experiments, 219
- Diffusion bonding
Development of a microchannel reactor concerning steam reforming of methanol, 123
- Disinfection
A contribution to the UV dose concept for bacteria disinfection in well mixed photoreactors, 197
- Dose
A contribution to the UV dose concept for bacteria disinfection in well mixed photoreactors, 197

- Dye
Photocatalytic decolorization of rhodamine B by immobilized TiO₂ onto silicone sealant, 133
- Dyeing industrial effluent
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Electrocatalytic effect
Investigation of oxygen electroreduction on polyvinylferrocene coated glassy carbon electrodes, 39
- Equilibrium concentration
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Ethylene
Reaction behaviors and mechanisms of catalytic pyrolysis of C4 hydrocarbons, 155
- Ethylene oxide
Catalytic incineration of ethylene oxide in the packed bed reactor, 173
- Ethylene production
Influence of process variables and optimization of ethylene yield in oxidative coupling of methane over Li/MgO catalyst, 187
- First-order rate constants
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Fixed-bed reactor
Chemical kinetics of hydroxylation of phenol catalyzed by TS-1/diatomite in fixed-bed reactor, 179
- Flue gas desulfurization
A semi-wet technological process for flue gas desulfurization by corona discharges at an industrial scale, 139
Kinetic model of non-thermal plasma flue gas desulfurization in a wet reactor, 149
- Flyash
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Gamma function
Particle size distribution effect on catalytic conversion in a CSTR, 233
- Gas
Analysis of mass transfer in the precipitation process of calcium carbonate using a gas/liquid reaction, 203
- H₂SO₄ activation
Characterization and phenols sorptive properties of carbons activated by sulphuric acid, 47
- High viscosity
Mass transfer to the wall of a packed and unpacked bubble column operating with Newtonian and non-Newtonian liquids, 105
- Hydrocracking
The effect of different feed flow patterns on the conversion of bubble column reactors, 163
- Hydroxylation of phenol
Chemical kinetics of hydroxylation of phenol catalyzed by TS-1/diatomite in fixed-bed reactor, 179
- Immobilization
Photocatalytic decolorization of rhodamine B by immobilized TiO₂ onto silicone sealant, 133
- Impeller flooding
Individual impeller flooding in aerated vessel stirred by multiple-Rushton impellers, 85
- Intermittent bubbling
Atrazine adsorption from aqueous solution using powdered activated carbon—Improved mass transfer by air bubbling agitation, 53
- k - ϵ model
The effect of different feed flow patterns on the conversion of bubble column reactors, 163
- Kinetics
Catalytic oxidation of NO by activated carbon fiber (ACF), 25
Catalytic incineration of ethylene oxide in the packed bed reactor, 173
- Utilization of fluidized bed reactor for the production of adsorbents in removal of malachite green, 211
- Kohonen's self-organizing maps
KSOM and MLP neural networks for on-line estimating the efficiency of an activated sludge process, 1
- Langmuir isotherm parameters
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Li/MgO
Influence of process variables and optimization of ethylene yield in oxidative coupling of methane over Li/MgO catalyst, 187
- Malachite green
Utilization of fluidized bed reactor for the production of adsorbents in removal of malachite green, 211
- Mass transfer
Mass transfer to the wall of a packed and unpacked bubble column operating with Newtonian and non-Newtonian liquids, 105
Utilization of fluidized bed reactor for the production of adsorbents in removal of malachite green, 211
- Mass transfer coefficient
Atrazine adsorption from aqueous solution using powdered activated carbon—Improved mass transfer by air bubbling agitation, 53
- Measurements
Mass transfer measurements in a non-isothermal bubble column using the uncatalyzed oxidation of sulphite to sulphate, 97
- Mechanism
Reaction behaviors and mechanisms of catalytic pyrolysis of C4 hydrocarbons, 155
- Methanol
Photoelectrochemical reduction of carbon dioxide at p-type gallium arsenide and p-type indium phosphide electrodes in methanol, 227
- Methylene blue dye
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Microchannel
Development of a microchannel reactor concerning steam reforming of methanol, 123
- Microchannel reactor
Continuous synthesis of zeolite NaA in a microchannel reactor, 115
- Model
Kinetic model of non-thermal plasma flue gas desulfurization in a wet reactor, 149
- Modeling
Catalytic oxidation of NO by activated carbon fiber (ACF), 25
- Monitoring
KSOM and MLP neural networks for on-line estimating the efficiency of an activated sludge process, 1
- Multi-level perceptron
KSOM and MLP neural networks for on-line estimating the efficiency of an activated sludge process, 1
- Multiple impeller
Individual impeller flooding in aerated vessel stirred by multiple-Rushton impellers, 85
- NO absorption
Reactive NO absorption in aqueous Fe^{II}(EDTA) solutions in the presence of denitrifying micro-organisms, 67
- Non-thermal plasma
Hydrogen enrichment of a methane–air mixture by atmospheric pressure plasma for vehicle applications, 13
Kinetic model of non-thermal plasma flue gas desulfurization in a wet reactor, 149
- OCM
Influence of process variables and optimization of ethylene yield in oxidative coupling of methane over Li/MgO catalyst, 187
- Optimization
Influence of process variables and optimization of ethylene yield in oxidative coupling of methane over Li/MgO catalyst, 187

- Oxidation
Catalytic oxidation of NO by activated carbon fiber (ACF), 25
- Oxygen electroreduction
Investigation of oxygen electroreduction on polyvinylferrocene coated glassy carbon electrodes, 39
- Palm kernel oil
Transesterification of crude palm kernel oil and crude coconut oil by different solid catalysts, 61
- Partitioned wet reactor
A semi-wet technological process for flue gas desulfurization by corona discharges at an industrial scale, 139
- Percentage of colour removal
Adsorption studies on treatment of textile dyeing industrial effluent by flyash, 77
- Petroleum
The effect of different feed flow patterns on the conversion of bubble column reactors, 163
- p-GaAs
Photoelectrochemical reduction of carbon dioxide at p-type gallium arsenide and p-type indium phosphide electrodes in methanol, 227
- pH control
Application of self-tuning PID control to a reactor of limestone slurry titrated with sulfuric acid, 19
- Phenols removal
Characterization and phenols sorptive properties of carbons activated by sulphuric acid, 47
- Photocatalytic decolorization
Photocatalytic decolorization of rhodamine B by immobilized TiO₂ onto silicone sealant, 133
- Photoelectrochemical reduction of CO₂
Photoelectrochemical reduction of carbon dioxide at p-type gallium arsenide and p-type indium phosphide electrodes in methanol, 227
- p-InP
Photoelectrochemical reduction of carbon dioxide at p-type gallium arsenide and p-type indium phosphide electrodes in methanol, 227
- Polyvinylferrocene
Investigation of oxygen electroreduction on polyvinylferrocene coated glassy carbon electrodes, 39
- Powdered activated carbon
Atrazine adsorption from aqueous solution using powdered activated carbon—Improved mass transfer by air bubbling agitation, 53
- Precipitation
Analysis of mass transfer in the precipitation process of calcium carbonate using a gas/liquid reaction, 203
- Propylene
Reaction behaviors and mechanisms of catalytic pyrolysis of C₄ hydrocarbons, 155
- Pseudo-components
The effect of different feed flow patterns on the conversion of bubble column reactors, 163
- Pt/Al₂O₃ catalyst
Catalytic incineration of ethylene oxide in the packed bed reactor, 173
- p-Type semiconductor
Photoelectrochemical reduction of carbon dioxide at p-type gallium arsenide and p-type indium phosphide electrodes in methanol, 227
- Reaction behaviors
Reaction behaviors and mechanisms of catalytic pyrolysis of C₄ hydrocarbons, 155
- Reaction mechanism
Chemical kinetics of hydroxylation of phenol catalyzed by TS-1/diatomite in fixed-bed reactor, 179
- Reactor model
Catalytic incineration of ethylene oxide in the packed bed reactor, 173
- Response surface methodology
Influence of process variables and optimization of ethylene yield in oxidative coupling of methane over Li/MgO catalyst, 187
- Rubberwood sawdust
Utilization of fluidized bed reactor for the production of adsorbents in removal of malachite green, 211
- Self-tuning control
Application of self-tuning PID control to a reactor of limestone slurry titrated with sulfuric acid, 19
- Semi-wet technological process
A semi-wet technological process for flue gas desulfurization by corona discharges at an industrial scale, 139
- Shuttling effect
Reactive NO absorption in aqueous Fe^{II}(EDTA) solutions in the presence of denitrifying micro-organisms, 67
- Sliding discharges
Hydrogen enrichment of a methane–air mixture by atmospheric pressure plasma for vehicle applications, 13
- Solar energy conversion
Photoelectrochemical reduction of carbon dioxide at p-type gallium arsenide and p-type indium phosphide electrodes in methanol, 227
- Solid catalysts
Transesterification of crude palm kernel oil and crude coconut oil by different solid catalysts, 61
- Solid particles
Reactive NO absorption in aqueous Fe^{II}(EDTA) solutions in the presence of denitrifying micro-organisms, 67
- Steam reforming of methanol
Development of a microchannel reactor concerning steam reforming of methanol, 123
- Stirred vessel
Individual impeller flooding in aerated vessel stirred by multiple-Rushton impellers, 85
- Streamer
A semi-wet technological process for flue gas desulfurization by corona discharges at an industrial scale, 139
- Structured packing
Mass transfer to the wall of a packed and unpacked bubble column operating with Newtonian and non-Newtonian liquids, 105
- Textural properties
Characterization and phenols sorptive properties of carbons activated by sulphuric acid, 47
- Thiele modulus
Particle size distribution effect on catalytic conversion in a CSTR, 233
- Transesterification
Transesterification of crude palm kernel oil and crude coconut oil by different solid catalysts, 61
- Transfer
Analysis of mass transfer in the precipitation process of calcium carbonate using a gas/liquid reaction, 203
- TS-1/diatomite catalyst
Chemical kinetics of hydroxylation of phenol catalyzed by TS-1/diatomite in fixed-bed reactor, 179
- UV radiation
A contribution to the UV dose concept for bacteria disinfection in well mixed photoreactors, 197
- UV/TiO₂
Photocatalytic decolorization of rhodamine B by immobilized TiO₂ onto silicone sealant, 133
- Volumetric mass transfer coefficients
Mass transfer measurements in a non-isothermal bubble column using the uncatalyzed oxidation of sulphite to sulphate, 97
- Wet reactors
Kinetic model of non-thermal plasma flue gas desulfurization in a wet reactor, 149
- WWTP
KSOM and MLP neural networks for on-line estimating the efficiency of an activated sludge process, 1
- Zeolite NaA
Continuous synthesis of zeolite NaA in a microchannel reactor, 115
