Subject Index of Volume 122

Absorption
Carbon dioxide absorption in glucosamine aqueous solutions, 81
Acetic acid
Beneficiation of Mardin-Mazıdağı (Turkey) calcareous phosphate rock using dilute acetic acid solutions, 135
Acid dyes
Application of *Azolla rongpong* on biosorption of acid red 88, acid green 3, acid orange 7 and acid blue 15 from synthetic solutions, 55
Adhesive performance
Continuous production of specialty waterborne adhesives: Tuning the adhesive performance, 117
Adsorption
Arsenic adsorption onto iron oxide-coated cement (IOCC): Regression analysis of equilibrium data with several isotherm models and their optimization, 93
Anionic reactive dye removal from aqueous solution using a new adsorbent—Sludge generated in removal of heavy metal by electrocoagulation, 107
Amine
Carbon dioxide absorption in glucosamine aqueous solutions, 81
Anaerobic
Kinetic analysis of treatment of textile wastewater in hybrid column upflow anaerobic fixed bed reactor, 87
Anaerobic digestion
Analysis of integrated kinetic and flow models for anaerobic digesters, 65
Arsenic
Arsenic adsorption onto iron oxide-coated cement (IOCC): Regression analysis of equilibrium data with several isotherm models and their optimization, 93
Asymptotic models
SCR of NO_x in loop reactors: Asymptotic model and bifurcational analysis, 175
Azolla rongpong
Application of *Azolla rongpong* on biosorption of acid red 88, acid green 3, acid orange 7 and acid blue 15 from synthetic solutions, 55

Bifurcational analysis
SCR of NO_x in loop reactors: Asymptotic model and bifurcational analysis, 175
Biodiesel
Monitoring of biodiesel production: Simultaneous analysis of the transesterification products using size-exclusion chromatography, 31
Biosorption
Application of *Azolla rongpong* on biosorption of acid red 88, acid green 3, acid orange 7 and acid blue 15 from synthetic solutions, 55
Bubble column
Carbon dioxide absorption in glucosamine aqueous solutions, 81
Bubble size distribution
Bubble size distribution and gas–liquid interfacial area in a modified downflow bubble column, 1

Chromatographic reactors
SCR of NO_x in loop reactors: Asymptotic model and bifurcational analysis, 175
Citral
Inverse temperature dependence due to catalyst deactivation in liquid phase citral hydrogenation over Pt/Al_2O_3, 127
CO oxidation
Alumina-supported nickel oxide for ozone decomposition and catalytic ozonation of CO and VOCs, 41
COD reduction
Anionic reactive dye removal from aqueous solution using a new adsorbent—Sludge generated in removal of heavy metal by electrocoagulation, 107
Congo Red
Anionic reactive dye removal from aqueous solution using a new adsorbent—Sludge generated in removal of heavy metal by electrocoagulation, 107
Contact angle
On the influence of sodium chloride concentration on equilibrium contact angle, 47
Continuous reactors
Continuous production of specialty waterborne adhesives: Tuning the adhesive performance, 117
Cure
Gelation and isoconversional kinetic analysis of lignin–phenol–formaldehyde resol resins cure, 159

Deactivation
Inverse temperature dependence due to catalyst deactivation in liquid phase citral hydrogenation over Pt/Al_2O_3, 127
Degree of mixedness
Analysis of solid particle mixing in inclined fluidized beds using DEM simulation, 21
Dimethyl carbonate
Reactive rectifying for producing dimethyl carbonate, 15
Discrete element method
Analysis of solid particle mixing in inclined fluidized beds using DEM simulation, 21
Dissolution kinetics
Beneficiation of Mardin-Mazıdağı (Turkey) calcareous phosphate rock using dilute acetic acid solutions, 135
Downflow bubble column
Bubble size distribution and gas–liquid interfacial area in a modified downflow bubble column, 1
DSC
Gelation and isoconversional kinetic analysis of lignin–phenol–formaldehyde resol resins cure, 159

Emulsion polymerization
Continuous production of specialty waterborne adhesives: Tuning the adhesive performance, 117
Equilibrium
Arsenic adsorption onto iron oxide-coated cement (IOCC): Regression analysis of equilibrium data with several isotherm models and their optimization, 93

doi:10.1016/S1385-8947(06)00352-4

Error analysis
Arsenic adsorption onto iron oxide-coated cement (IOCC): Regression analysis of equilibrium data with several isotherm models and their optimization, 93
Expanded granular sludge bed
Analysis of integrated kinetic and flow models for anaerobic digesters, 65

Flow models
Analysis of integrated kinetic and flow models for anaerobic digesters, 65
Fractional fluidization
Analysis of solid particle mixing in inclined fluidized beds using DEM simulation, 21
FT-IR spectrum
Anionic reactive dye removal from aqueous solution using a new adsorbent—Sludge generated in removal of heavy metal by electrocoagulation, 107

Gametophyte cells
Rapid optimization of process conditions for cultivation of transgenic *Laminaria japonica* gametophyte cells in a stirred-tank bioreactor, 11
Gas–liquid dispersion
Bubble size distribution and gas–liquid interfacial area in a modified downflow bubble column, 1
Gelation
Gelation and isoconversional kinetic analysis of lignin–phenol–formaldehyde resol resins cure, 159

HBsAg
Rapid optimization of process conditions for cultivation of transgenic *Laminaria japonica* gametophyte cells in a stirred-tank bioreactor, 11
Hydrogenation
Inverse temperature dependence due to catalyst deactivation in liquid phase citral hydrogenation over Pt/Al_2O_3, 127

Inclined fluidized bed
Analysis of solid particle mixing in inclined fluidized beds using DEM simulation, 21
Industrial reactor
Xylene isomerization in a membrane reactor. Part II. Simulation of an industrial reactor, 149
Interfacial area
Bubble size distribution and gas–liquid interfacial area in a modified downflow bubble column, 1
Isotherm
Arsenic adsorption onto iron oxide-coated cement (IOCC): Regression analysis of equilibrium data with several isotherm models and their optimization, 93

Kinetics
Application of *Azolla rongpong* on biosorption of acid red 88, acid green 3, acid orange 7 and acid blue 15 from synthetic solutions, 55
Kinetic analysis of treatment of textile wastewater in hybrid column upflow anaerobic fixed bed reactor, 87
Inverse temperature dependence due to catalyst deactivation in liquid phase citral hydrogenation over Pt/Al_2O_3, 127
Gelation and isoconversional kinetic analysis of lignin–phenol–formaldehyde resol resins cure, 159

Laminaria japonica
Rapid optimization of process conditions for cultivation of transgenic *Laminaria japonica* gametophyte cells in a stirred-tank bioreactor, 11
Loop reactors
SCR of NO_x in loop reactors: Asymptotic model and bifurcational analysis, 175

Mathematical modeling
Analysis of integrated kinetic and flow models for anaerobic digesters, 65
Membrane reactor
Xylene isomerization in a membrane reactor. Part II. Simulation of an industrial reactor, 149
Methanol
Reactive rectifying for producing dimethyl carbonate, 15
Methanolysis selectivity
Monitoring of biodiesel production: Simultaneous analysis of the transesterification products using size-exclusion chromatography, 31
MFI membranes
Xylene isomerization in a membrane reactor. Part I: The synthesis of MFI membranes for the *p*-xylene separation, 167
Modeling
Kinetic analysis of treatment of textile wastewater in hybrid column upflow anaerobic fixed bed reactor, 87
Modeling of gas–solid flow
Particle size distribution modeling in the object oriented simulation of gas–solid flow, 141
Monolayer coverage
Anionic reactive dye removal from aqueous solution using a new adsorbent—Sludge generated in removal of heavy metal by electrocoagulation, 107

Nickel oxide
Alumina-supported nickel oxide for ozone decomposition and catalytic ozonation of CO and VOCs, 41

Ozone decomposition
Alumina-supported nickel oxide for ozone decomposition and catalytic ozonation of CO and VOCs, 41

Packed column
Application of *Azolla rongpong* on biosorption of acid red 88, acid green 3, acid orange 7 and acid blue 15 from synthetic solutions, 55
Particle size distribution
Particle size distribution modeling in the object oriented simulation of gas–solid flow, 141
pH
Rapid optimization of process conditions for cultivation of transgenic *Laminaria japonica* gametophyte cells in a stirred-tank bioreactor, 11
Phenolic resins
Gelation and isoconversional kinetic analysis of lignin–phenol–formaldehyde resol resins cure, 159
Phosphate rock
Beneficiation of Mardin-Mazıdağı (Turkey) calcareous phosphate rock using dilute acetic acid solutions, 135
Pneumatic conveying
Particle size distribution modeling in the object oriented simulation of gas–solid flow, 141
Polydispersed mixtures
Particle size distribution modeling in the object oriented simulation of gas–solid flow, 141
Polyphosphoric acid
Reactive rectifying for producing dimethyl carbonate, 15
Porous media
On the influence of sodium chloride concentration on equilibrium contact angle, 47
Process conditions
Rapid optimization of process conditions for cultivation of transgenic *Laminaria japonica* gametophyte cells in a stirred-tank bioreactor, 11

Reactive rectifying
Reactive rectifying for producing dimethyl carbonate, 15

Salt transport
On the influence of sodium chloride concentration on equilibrium contact angle, 47

Selective catalytic reduction
SCR of NO_x in loop reactors: Asymptotic model and bifurcational analysis, 175
SEM micrograph
Anionic reactive dye removal from aqueous solution using a new adsorbent—Sludge generated in removal of heavy metal by electrocoagulation, 107
Simulation
Xylene isomerization in a membrane reactor. Part II. Simulation of an industrial reactor, 149
Size-exclusion chromatography
Monitoring of biodiesel production: Simultaneous analysis of the transesterification products using size-exclusion chromatography, 31
Stirred-tank bioreactor
Rapid optimization of process conditions for cultivation of transgenic *Laminaria japonica* gametophyte cells in a stirred-tank bioreactor, 11
Sunflower oil
Monitoring of biodiesel production: Simultaneous analysis of the transesterification products using size-exclusion chromatography, 31

Textile wastewater
Kinetic analysis of treatment of textile wastewater in hybrid column upflow anaerobic fixed bed reactor, 87
TMA
Gelation and isoconversional kinetic analysis of lignin–phenol–formaldehyde resol resins cure, 159
Transesterification
Monitoring of biodiesel production: Simultaneous analysis of the transesterification products using size-exclusion chromatography, 31

Upflow anaerobic sludge blanket
Analysis of integrated kinetic and flow models for anaerobic digesters, 65
Urea
Reactive rectifying for producing dimethyl carbonate, 15

VOCs complete oxidation
Alumina-supported nickel oxide for ozone decomposition and catalytic ozonation of CO and VOCs, 41

Waterborne adhesives
Continuous production of specialty waterborne adhesives: Tuning the adhesive performance, 117
Wettability
On the influence of sodium chloride concentration on equilibrium contact angle, 47

Xylene isomerization
Xylene isomerization in a membrane reactor. Part II. Simulation of an industrial reactor, 149
Xylene separation
Xylene isomerization in a membrane reactor. Part I: The synthesis of MFI membranes for the *p*-xylene separation, 167
